Pope John Paul II praying Friday at St. Peter's tomb.

Pope Returns to Vatican

VATICAN CITY - Pope John Paul II, looking pale and drawn, returned home from the hospital Friday after thanking everyone worldwide who prayed for him during his three-month recuperation from gunshot wounds.

Doctors said he had completely recovered from the wounds suffered May 13 in an assassination attempt but still needed six weeks of convalescence:

The pope, wearing white vestments, waved and said "arrivederci ... goodbye" to the crowd of well-wishers who broke into song as he walked slowly through the cornidor of Rome's Gemelli Hospi-tal. He embraced Dr. Francesco Crucitti, the surgeon who per-formed two operations for him. formed two operations on him."

The 61-year-old pontiff later prayed at the tomb of St. Peter in the grottoes beneath St. Peter's Basilica, The pope's three immedi-nte predecessors --- John XXIII, Paul VI and John Paul E -- are among those buried there: "I wanted to bonor and thank St. Peter for having wanted to

keep alive his successor. As I was praying over the tombs I thought there could have been an additional one, but the Madon-

Yamani **Sees Deal On Prices** Saudis May Cut **Oil Production**

From Agency Dispatcher BEIRUT --- Sheikh Ahmed Zaki Yamani, Sandi Arabia's oil minis ter, said Friday that the Organization of Petroleum Exporting Coun-tries would "succeed in unifying" oil prices next week, the official Sandi press agency reported.

While not referring specifically to an emergency meeting that the 13-nation oil cartel has scheduled in Geneva beginning next Wednes-day, Sheikh Yamani said that price unity would be achieved at the next OPEC meeting.

"The conference will succeed in unifying prices," Sheikh Yamani said. "But the organization faces two crucial years, which will prove very difficult."

very difficult. Sheikh Yamani also said Saudi Arabia, the world's largest export-er, expected within the next two years to reduce its daily production levels, which are running at a near maximum level of 10.3 mil-lion barrels a day. But he added, "The current glut on world mar-kets will continue even if Saudi Arabia produces less oil."

He said: "Unifying prices is the only way to reduce Saudi produc-tion. As soon as that is achieved, our production will fall under market pressures to a level much lower than that at present."

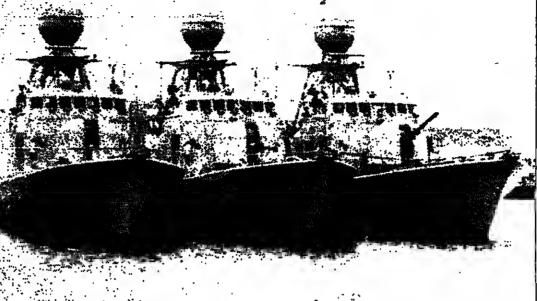

Nigerian Output Down

The glut has forced production levels down in other OPEC na-tions. Yahya Dikko, Nigerian pres-idential adviser on petroleum, said at a news conference Friday in Lagos that Nigeria's July oil output was just over 800,000 barrels a day, down 40 percent down from January's levels.

OPEC has not had a unified price policy since early 1979, and an attempt by the organization in May to resolve the issue was unessful

The price of oil ranges from a low of \$32 a barrel, charged by Saudi Arabia for its light crude, to more than \$40 a barrel, charged by. Libya and some African producers for their top premium oil.

Mr. Dikko would not far Nigeria might cut its oil price from its current \$40 a barrel, claiming that any statement might

Three gunboats tied up in Cherbourg before their departure for Iran. One was later seized.

Anti-Khomeini Commandos Seize French-Built Gunboat Near Spain

The Associated Pres

MADRID — A French-built gunboat being deliv-ered to Iran has been seized off the port of Cadiz by anti-Khomeini commandos who boarded from a commandeered tugboat, Spanish Navy officials said Friday.

The gunmen boarded the 160-foot gunboat Thursday morning with the belp of some of its crew and without firing a shot, then sailed it toward Tangier, Morocco, across the Strait of Gibraltar, officials said.

Two other gunboats in the convoy were escorted to the port of Algeciras, Spain, the officials said. They said those boats stayed overnight, then left with their crews, apparently heading for the Suez Canal and home

Telephone callers to news media in Paris said the commandos opposed the regime of the Ayatollah Ruhollah Khomeini, and that they had captured two of the gunboats and were near Casablanca. Morocco denied that any Iranian gunboat was in its waters.

The French boats were of the fast patrol type, armed with 76mm and 40mm guns and designed to carry four missiles each. French naval sources said the boats were not carrying any missiles when they left France.

The callers to Paris said that the commandos were led by former Iranian Adm. Kamal Habibollahi and that the maneuver was planned by former Gen. Bahram Aryana, who was commander of Iran's armed forces under the late Shah Mohammed Reza Pahlavi. The callers said Gen. Aryana is the leader of

an organization named Azadegan, or Freedom Seek-

The Spanish Foreign Ministry said the gunboats were about 5 miles (8 kilometers) from Cádiz when the gunmen pulled alongside.

Spanish Navy officials identified the captured gunboat as the Tabarzin and the other two as the Khanar and Neyzer. The officials said the navy tracked the captured boat to Tangier after it reported by ra-dio that it bad developed mechanical trouble.

Antonio Zajara, captain of the tugboat used by the commandos, said 15 or 16 persons rented his boat for a sightseeing tour of Cádiz Bay. He said they took control of the tug at gunpoint and cut its communi-cations, then pulled alongside the gunboat. Mr. Zajara said four or five uniformed men aboard

the gunboat "belped the commandos to get on board," and that the rest of the Iranian crew lay down on the deck.

The gunboats were the last of 12 ordered in 1974 by the shah. Delivery was beld up for two years after the overthrow of the monarchy by Ayatollah Khomeini's followers.

The three boats left France on Aug. 1, three days after France decided to grant political asylum to former Iranian President Abolhassan Bani-Sadr. France denied there was any connection between the incidents.

The gunboats stopped Aug. 2 to 5 in the northern Spanish port of El Ferrol before arriving at Cádiz on Aug. 7.

Polish Leaders Visit Brezhnev

Kania, Jaruzelski Likely to Face Hard Ouestions in Crimea Talks

From Agency Dispatches WARSAW — Poland's top two leaders arrived in the Soviet Crimea on Friday and began meetings with Soviet officials as Polish workers celebrated the first anniversary of the Gdansk strikes that

Solidarity. The Communist Party leader, Stanislaw Kania, and Premier Wojciech Jaruzelski were sum-moned to crisis talks with Soviet President Leonid I. Brezhnev a day after the Soviet Union announced major military maneuvers near Po-land next month. The maneuvers will coincide with Solidarity's na-

tional congress. Tass said Mr. Kania and Mr. Jaruzelski were met by Soviet For-eign Minister Andrei A. Gromyko and Konstantin Rusakov, secre-tary of the Communist Party Cen-tral Communitee, at Simferopol in the Crimea for a visit to Mr. Bre-zhnev's Black Sea retreat. Mr. Busekey based for a visit Rusakov handles relations with

came from the Soviet Central Committee. Western diplomats saw this formulation as frosty and said it indicated the Polish leaders would come in for some bard ques-

briefly with the Poles on Friday.

Diplomats said the talks were likely to be dominated by Soviet criticism of Mr. Kania's bandling of the situation in Poland, particularly following the anti-government street protests and strikes over food shortages in recent eeks.

Mr. Brezhnev will probably also warn the Polish leaders against allowing any further political or economic reforms following the sweeping changes of the past year. they said

On Friday, Western military attaches were formally notified by the Soviet Defense Ministry of the weeklong maneuvers along Po-land's eastern border and in the Baltic Sea.

coological pressure on the Poles to settle the country's political and economic crises. Ustinov has taken charge of a So-viet war game. Western military experts said this suggested the ex-Warsaw Pact states. The "invitation" to a "short working visit in the nearest future"

ercises could be among the biggest Soviet military operations for ycars. In Gdansk, ship sirens and horns blared for one minute at tioning when they begin discus-sions with Mr. Brezhney. He met noon to mark the anniversary of

Street Protests

Lenin shipyard struck and demanded, among other things, inde-pendent trade unions for the first time in Eastern Europe. The ceremonies included a Mass and a

wreath-laying at a monument to workers killed in riots in 1970. Lech Walesa, the Solidarity/ leader, called Friday on the union to consolidate its gains of the pas year rather than to keep pressi for more. He told a crowo of sev al hundred that the union did 4

seek the government's power, "not do we want to overthrow it." "Let the government govern the country," he said, "and we will govern ourselves in the factories.

We will do everything to serve the nation: then perhaps we will have

na that May 13 thought differently," be was quoted as the Vatican spokesman, the Rev. Romeo Panciroli.

The pope will recite a prayer Saturday to mark the Feast of the Assumption and will appear at his apartment window to greet the faithful in SL Peter's Square, the Vatican said. He is expected to spend several days at the Vatican before leaving for his summer home in Castel Gandolfo in the Alban Hills south of Rome.

U.S. Transport Aide **Unyielding on Strike**

WASHINGTON - U.S. Trans-

portation Secretary Drew L. Lewis Jr. stood by the administration's

"We've established a principle and we're going to stick with it." Mr. Lewis said Friday, adding that the move is expected to save \$200 million in the next three years.

His remarks were a reply to a charge by Robert E. Poli, president of the Professional Air Traffic Controllers Organization, that the government will have to "spend 10 or 20 times as much money as we're asking for ... in an attempt to break our union."

Mr. Lewis said that newly hired replacements for the controllers will receive lower wages than the strikers in many cases and that the administration is reducing the 17,000-person controller force by 3.000.

Meanwhile, the U.S. Federal Aviation Administration reported that commercial aircraft have been radioed bogus commands three times since the strike began Aug. 3 - once in Florida and twice near Denver. An FAA spokesman said that his agency, the Federal Com-munications Commission and the FB1 were investigating the incidents. "In no case has a hazardous situation resulted," he said.

Decision Deferred

In Amsterdam, the vice president of the International Federa-tion of Air Traffic Controllers Associations reiterated Friday that his group had deferred untel Aug. 22 any decision on whether to take action in support of the U.S. strike.

The federation's executive board decided Thursday to advise against international moves to restrict flights to U.S. destinations for the time being.

The vice president, Lex Hen-driks, said Friday: "We have not had an official response from the American president, but we have heard that he has rejected our appeal for a resumption of negotiations and our offer of advice. Nev-[ederation's] general assembly meeting in Amsterdam sext week

±.,

before considering tougher - ac-tion."

[Leaders of 1,350 British air traffic controllers decided Friday to policy of firing striking air traffic defer any action in support of the controllers, and traffic returned to striking U.S. controllers. The Asalmost normal Friday on transat- sociated Press reported. Union leaders for Portugal's controllers, who handle southern transatlantic routes, said their members would vote Friday on whether to go along with the international federation's request, but would not announce

the result before Sameday.] Commercial air travel in the United States has been reduced to

about 75 percent of normal levels, which the airline industry esti-mates is costing it \$30 million a day. Hundreds of airline employees, from pilots to clerks, have been laid off.

2

prejudice next week's OPEC talks. Sheikh Yamani called for a reduction in the average oil price followed by a freeze "for a long time." He said OPEC had been weakened by repeated sharp price mercases.

Blames Glut

He blamed the glut, which he es-timated at 2.5 million barrels a day in surplus oil production, on diminishing demand by consuming nations and high prices charged by other OPEC members.

"It is enough for us to know that OPEC members two years ago were producing more than 31 million barrels per day," Sheikh Yamani said. But demand has been reduced, and this reduced output to less than 24 million barrels per day." The oil minister then predicted

that in the next two years the OPEC output would fail to "less than 22 million barrels daily."

"The difference between 31 milhion and 23 million is the surplus which has forced the decrease in demand," he said, defending his country against charges that it had purposely flooded the market to force down prices.

"Our stand regarding prices is clear," Sheikh Yamani said. "Our reasons were to soften the burden of the poorer nations and more recently to protect OPEC itself, but while we always try to keep our prices down and unify OPEC prices, others raise their prices. This forces us to raise ours, and so it goes. Had it not been for or stand the price problem would be a ca-tastrophe."

Always in the Air

Saudi Arabia, which accounts for 40 percent of OPEC's total production, has also argued that high prices would force industrial nations to turn to other sources of energy.

Sheikh Yamani also defended his country against charges that its high production had allowed importing nations to fill their **TESETVES**

"This is an ignorant assumption, and anyone who knows anything about the oil industry should know that stocking of reserves has now stopped and that companies are now using oil from their reserves," he said.

He said that Western consuming nations stockpiled reserves in 1979 and 1980 when the Saudi Arabians were producing at relatively low levels and other OPEC members were pumping at full capacity.

According to oil industry estimates, demand in the Western industrialized countries fell about 7.5 percent in 1980 and a further decline has taken place this year.

Karl Böhm during a rehearsal in Salzburg last May.

Austrian Conductor Karl Böhm Dies at 86 After Lengthy Illness

From Agency Dispatches SALZBURG --- Karl Böhm, 86, one of the world's foremost conductors, died here Friday after a lengthy illness.

To many people he stood as the last representative figure in the Germanic-Viennese tradition of music-making that included such conductors as Wilhelm Furtwängler, Clemens Kraus, Erich Kleiber, Karl Muck and Bruno Walter.

Mr. Böhm suffered a stroke in Vienna last March during a televi-sion recording of Richard Strauss' opera, "Elektra." He never fully recovered, and his health deteriorated earlier this week. Doctors said Wednesday that he had lapsed into coma at his Salzburg home.

Mr. Böhm's illness had forced him to cancel most of his plans to conduct at festivals in Vienna, Bregenz and Linz and at the Salzburg summer festival of music. He still had planned to conduct one concert at Salzburg later in the summer despite his illness.

In the last years of his life, his only concession was to conouct concerts from a chair on the podium instead of standing up. In an interview this summer, Mr. Böhm announced his resignation from the opera stage and concert hall,

but vowed to continue recording music. He still wanted to conduct Franz Schubert's "Unfinished

Sympbony" in the waning days of this year's Salzburg festival, but he would have been to weak to com-ply, his friends said. A renowned interpreter of the works of Mozari, Mr. Böhm stari-

ed his career in 1921. His 60 years of performing music included more than 40 years with the Salzburg festival and 48 years as a conductor of the Vienna Philharmonic.

"I am with you in my thoughts." read a telegram sent by the maes-tro to the orcbestra when he was forced to cancel concert engagements in Austria earlier this year. Mr. Böhm's specialties were Mozart, Wagner and Richard

"Daphne" to Mr. Böhm. Born in Graz Austria, Mr. Böhm initially embarked on a law

career. He received a doctorate in law from Graz University in 1919 while simultaneously studying mu-sic with Eusebius Mandyczewski and Guido Adler in Vienna Although he received many academic and government honors later in his life, he preferred to be known as "Herr Doktor," in recognition of

his earned degree. His debut as a conductor took place at the Graz Opera in 1917 and the work was Nessler's now-forgotten "Der Trompeter von Sackingen."

Mr. Böhm followed the pre-scribed route for young European conductors in those days by traveling up the ladder of success through provincial opera bouses. He went from 2 conducting post in Munich to Darmstadt and Hamburg, eventually becoming general (Continued on Page 2, Col. 7)

Weinberger Reported to Favor Expanded Nuclear Deterrent

Pentagon Chief Expected to Propose Overhaul Exceeding Previous Plans

The following article is based on reporting by Richard Hallo-ran, Leslie H. Gelb and Howell Raines and was written by Mr.

Washington --- Secretary of Defense Caspar W. Weinberger has prepared for President Reagan a comprebensive proposal to expand the U.S. strategic nuclear deterrent forces, according to senior administration officials. The proposal goes well beyond previous plans to strengthen those forces, the sources said.

The costly plan would encompass intercontinental ballis-tics missiles, long-range bombers, Trident submarines armed with more accurate missiles and, especially, a vast rebuilding of the extensive communications apparatus through which the strategic forces are controlled.

A key to the proposal, the senior officials said, would be the exploitation of U.S. technological advantages to offset Soviet strength in numbers of weapons and, more important, to prevent an enemy from concentrating on any single countermeasure.

Details Undecided

Because the proposal might add a new airborne missile force as well as improve existing weapons, the officials suggested that the lines could become blurred within the triad of missiles, bombers and submarine-launched missiles that has formed the basis of the strategic deterrent force for the last 20 years.

Mr. Weinberger plans to discuss the new concept with Mr. Reagan and other senior officials next week in California, officials said. But they remarked that since some important elements of the plan and many details remain undecided, they did not know when an announcement of a final decision would be made. Mr. Reagan said Thursday that he probably would not announce his decisions on the bombers or on MX missile deployment before September.

-1

As described by several senior officials, the main aspects of the proposal are as follows:

• Mr. Weinberger would recommend a new airborne base for the MX missile, but be was said to be undecided on additional bases to be used until a new fleet of aircraft is built.

· He would recommend building a new version of the Bl bomber, but the number produced would depend on how fast the advanced "Stealth" bomber could be developed.

• Mr. Weinberger wants to push ahead with deployment of the Trident submarine with improvements in the present Trident-1 missile and accelerated development of the more powerful Trident-2.

· For the first time, strengthening the command and communications network would be given emphasis equal 10 weapons systems and would receive heavy investment.

The proposed plan, the senior officials asserted, was in-tended to enable the United States to regain nuclear superiority over the Soviet Union within this decade. The administration intends to back the traditional vocabulary of deterrence, the officials said, through building a capacity to fight nuclear wars that ranged from a limited strike through a protracted conflict to an all-out exchange.

The nuclear plan, they said, was intended to complement Mr. Weinberger's instructions to the armed forces to ac-quire the ability to wage conventional war in long-term global conflicts and limited wars as well as commando raids gainst terrorists.

Cost Unclear

The officials said that they did not yet know what the proposal would cost because the balance and mix of forces had not been decided and the engineering studies had not been completed. Adding up various estimates would bring the cost of this package into the neighborhood of \$200 bi-lion, or about 13 percent of the \$1.5 trillion the administration expects to request in military budgets over the next five years.

Even with that expenditure, strategic thinkers inside and outside the administration asserted that there was no guar-antee that the United States could regain the nuclear superiority the administration sought. Some contended that nuclear superiority meant little with today's enormous nuclear arsenals on both sides.

The senior administration officials said that the strategic deterrent required a combination of weapons that could survive a Soviet attack, respond in precise accord with the commands of the president, penetrate Soviet defense to strike targets accurately and not cost so much that they robbed the United States of sufficient conventional forces. No single weapon, they pointed out, had all those attributes,

Communications Crucial

Critical to the success of the concept, the officials said. were weapons and communications that could survive a Soviet attack. They contended the Soviet Union would be deterred from nuclear or conventional aggression if leaders in Moscow knew that the United States could weather an attack with the president still able to command a missile to be fired directly at the Kremlin and other vital targets.

An essential new element of the concept, the senior officials said, would be developing a radically new airplane to carry the MX missile under development on continuous flight over millions of square miles of land and water.

With 10 to 20 of the airplanes cruising at 150 mph over the South Pacific or North Atlantic, at high altitudes and low, on irregular patterns and schedules, the Soviet Union would be unable to detect or to track or to destroy them, the officials said.

The new aircraft, which could fly for more than 48 hours and even longer with aerial refueling, would be relatively

INTERNATIONAL HERALD TRIBUNE, SATURDAY-SUNDAY, AUGUST 15-16, 1981

Reagan Cites Russians' Buildup In Defending Neutron Decision

New York Times Service GOLETA, Calif. - President Reagan, defending his recent decision to produce neutron warheads. is maintaining that the weapon is defensive in nature and that it will not be deployed in Europe without "full consultations" with U.S. allies.

Speaking at an impromptu news conference Thursday at his ranch in the Santa Ynez Mountains, Mr. Reagan also declared again that his military spending was aimed at countering "the greatest military buildup in the history of man" by the Soviet Union.

"What we are in is a situation where we're being realistic about their military buildup, which has gone unchecked in spite of all of the meetings having to do with arms control," Mr. Reagan said. He accused the Soviet Union of waging a propaganda campaign to distort the nature of the neutron weapon decision.

Reagan Not Surprised

Referring to Soviet protests over his decision, which was disclosed last weekend, Mr. Reagan added: "I can understand their anguish. They are squealing like they're sit-ting on a sharp nail simply because we now are showing the world that we are not going to let them get to the point of dominance where they can some day issue to the free world an ultimatum of 'surrender or die.' And they don't like that."

But Mr. Reagan also said that he wanted to discuss "legitimate-ly" the reduction of armaments on both sides, although he was not ready to do so soon. The president noted that he had agreed to begin preliminary talks on limited-range nuclear weapons in Europe with the Russians this fall, but that more extensive talks would be put off until later.

Asked if he wanted to meet soon with Leonid I. Brezhnev, the Soviet leader, to discuss arms reductions, Mr. Reagan said, "Nn." He said that such an encounter would have to take place after "preliminary meetings at the ministerial level" and after "we are ready to come forward with a program" of mutual arms reduction.

No Call for Summit

He also said that in a recent communication with Mr. Brezhnev he had suggested that the two "might sit down sometime" to discuss Mr. Reagan's observation that "governments sometimes get in the way of the people" and that the Soviet Union and the United States had "a great many things in common." But after the news conference, Mr. Reagan's aides said that this communication contained no specific call for a summit meet-

ing. Mr. Reagan also said he would announce his decision next week in Los Angeles on whether to proces with the delivery of F-15 and F-16

U.S. Seeking Accord to Bar A-Weapons From Mideast, Using Latin Pact as Model

By Bernard Gwertzman

New York Times Service WASHINGTON — The United States, in the aftermath of Israel's bombing of Iraq's nuclear reactor, has launched a major effort to forge an agreement for a zone free of nuclear weapons in the Middle East, according to the director of the Arms Control and Disarma-

ment Agency. , Eugene V. Rostow said Thurs-day that "we've started prelimi-nary diplomatic talks" both with nations in the Middle East and with outside powers on the possibility that such a treaty can be negotiated. He said the idea is to pattern it on the Treaty of Tlateloico, which was signed in Mexico in 1967 and prevents nuclear weapons from being introduced in Latin America.

Mr. Rostow, who was confirmed as director of the Arms Control and Disarmament Agency last month, said that while the exact "scenario" had not been worked out, "there will certainly be an announcement of an American posisources said Friday. Mr. Begin will be following Egyptian President Anwar Sadat, sembly session that begins next month.

WORLD NEWS BRIEFS

Afghan Rebels Active, Soviet Daily Concedes Resters

MOSCOW - The Soviet armed forces newspaper, Krasnaya Zvezda (Red

MUSLUW — The Soviet armed forces newspaper, Krasnaya Zvezda (Keo Star), sai. Friday that Afghan government forces were facing a tough battle against gnerrilla insurgents but could always rely on help from Moscow. The daily made the rare admission that the guerrillas were operating on a major scale. It said they were carrying out "furious" raids on villages, burning fields of grain and slaughtering livestock. Villagers were often killed in the raids, and the victims were chiefly members of the Communist Party, it added.

Long after Soviet troops intervened in Afghanistan in December, 1979, the official media played down rebel operations. But recently, occasional reports have hinted at the strength of resistance against the Sovict-backed government in Kabul - perhaps, Western diplomats say, in an effort to explain to Soviet critzens that troops are still needed in Afghanistan.

Pretoria Official Expecting More Rebel Raids

JOHANNESBURG -- Defense Minister Maguns Malan warned South Africans on Friday that a rocket attack by black nationalist guerrillas on a major military base this week would probably be followed by other attacks.

"The primary aim of the enemy is to unnerve, through maximum publicity," Gen. Malan said in a speech opening a new military camp south of Johannes

Responsibility for the attack on the Voortrekkethoogte military complex near Pretoria was claimed by the outlawed African National Congress, which aims to overthrow white rule in South Africa, Four 122mm rockets were fired at the base, causing slight damage but no serious injuries.

RAF Ends Its Search for North Sea Survivors

The Associated Press GREAT YARMOUTH, England — The Royal Air Force called off its search Friday for possible survivors of the North Sea's second fatal helicopter crash in 24 hours, saying there was "no hope now of finding anyone alive." Four men were still missing in Britain's worst helicopter disaster in 16 years of block for oil and are subconterior.

of North Sea oil and gas exploration. Nine bodies were recovered from the Britisb-owned Wessex craft that

plunged into a calm sea Thursday, carrying two crewmen and 11 gas rig mainte-nance workers employed by Amoco (U.K.) Exploration Co. All 13 men aboard were British. On Wednesday, one man died and 13 were saved when a Bell belicopter fell into the sea northeast of the Sheiland Islands.

Italian Minister Warns France Over Wine War The Associated Press

ROME - Italy's foreign trade minister warned France on Friday that it risks facing "drastic countermeasures" if a solution is not found in the battle over the wine trade.

The French restrictions on Italian wine are contrary to rules of the European Economic Community, which Italy wants to mediate the dispute, Nicola Capria

told the Palermo newspaper Ora. Italian Fremier Giovanni Spadolini also sent a private note to the French prime minister, Pierre Mauroy, regarding the dispute, the premier's office in Rome said. It did not provide details.

Moscow Court Upholds Brailovsky's Sentence United Press Intern

MOSCOW --- An appeals court, at thearing from which the defendant was barred, Friday unheld the semence of five years in internal exile imposed on Jewish activist Victor Brailovsky, his wife, Irina, reported.

She said the court in Moscow upheld the sentence that Mr. Brailovsky received after a two-day trial in June on charges of slandering the Soviet state. In another case, the prosecution asked for the maximum sentence of seven years in prison and seven years in exile for Yevgeny Antsupov, a historian, whn has pleaded not guilty to a charge of anti-Soviet agitation and propaganda.

New York Daily News Reduces Its Staff Undered Press Interno

NEW YORK - The New York Daily News, the second largest circulation daily newspaper in the United States, announced Friday it would lay off 320 of its 4,000 employees, reduce executive salaries by 10 percent and fold its infant altemoon edition in two weeks.

The paper, which publishes both morning and afternoon editions, cited rising production costs and a projected loss of \$11 million this year.

The announcement was made to the staff by Michael J. O'Neill, the editor, shorthy before Robert M. Hunt, president and publisher, made the announce-ment to the public. "This is probably the hardest thing that I have done in my life," Mr. O'Neill said, adding that "the adverse economic conditions made it impossible to continue."

Between 10,000 and 15,000 persons marched through the center of Amsterdam Thursday night to protest the Reagan decision to produce and stockpile neutron weapons. No violence was reported.

Functional Approach

Loath to gesturing much on the concert podium, he said: "I am glad some young colleagues of mine have said, Good God, if I wait to get a little older, and you won't be gesticulating any more."

"Yon shouldn't even look at the brass at times, or else they get too loud," he said in a 1979 television interview. "That is why I feel that excessive fumbling around of the conductor is no good for the orchestra and the andience."

Writing in the New Grove Dic-tionary of Music and Musicians, Gerhard Brunner sums up Mr. Böhm's overall musical approach as "expressed in strictly functional gestures" and that he was "direct, fresh, energetic and authoritative.

Mitterrand to See Reagan

PARIS — French President Francois Mitterrand will meet President Reagan, probably at the Virginia site of the battle of Ynrktown, during a visit on Oct. 18 or 19, it was announced here Friday.

Following Lengthy Illness avoiding touches of romantic sentimentality or self-indulgent virmoso mannetisms. His skillful bal-ance and blend of sound, his feeling for a stable tempo and his sense of dramatic tension make Böhm one of the outstanding con-

ductors of the century." Years ago, during rehearsing in Salzburg, Mr. Böhm complained about what he saw as deficiencies in some modern works of music.

Form and Heart

"What I miss in many conten porary compositions is form," I said. "Like any other works of a music is — also — form ... and i cannot exist without form. But I also miss heart, and you have got to have heart; you cannot make good music otherwise."

His major concession to 20thcentury works was the conducting of important productions of the two operas of his compatriot, Al-

ban Berg, "Wozzeck" and "Lulu." But Mr. Böhm loved Mozart more than anything in the realm of music and once said, "Whenever I conduct Mozart I feel refreshed after 10 minutes, even if I was tired before. That music keeps me young. It's a pleasure, not work) have to accomplish." Once asked what he would do if

Beethoven came in by the door, he said: "I would get up, politely raise my hat and bid a friendly greet-And if it were Mozart? "I would int from excitement," he replied.

Liberia Executes **5 Army Officers** For Plotting Coup

MONROVIA, Liberia - A firdeputy head of state, Maj. Gen. Thomas W. Syen, and four other army officers Friday for plotting to kill the head of state, Samuel I Doe, the Liberia news agency said.

Also executed at a military barracks were Lt. Cols. Harris S. Johnson, Nelson B. Toe and Robert F. Sumo and Maj. Henry S. Zuo. They were convicted Thursday by a military tribunal after a closed three-day trial.

All were senior members of the military regime. Gen. Syen had served as second to Commander in Chief Doe, who as a master sergeant led the coup that overthrew the government of President William Tolbert in March, 1980.

A former local government min-ister, Maj. Oscar J. Quiah, was acquitted of involvement in the plot. Two civilians were found guilty of "concealing discussions" of the defendants; each received a 10-year

entence. The trial began Monday after the discovery on Sunday of the plot to overthrow and kill the head of state, the news agency sold,

BRIE U.S. Panel Supports Entry of Vietnamese

Los Angeles Times Service WASHINGTON - The United

States should continue indefinitely to offer permanent residence to thousands of Victnamese who have fled their homeland, a special advisory commission on refugees has said.

In a report to Secretary of State Alexander M. Haig Jr., the com-mission said Thursday that the hope that the Vietnamese refugee problem would be a temporary one is now "giving way to a realization that political considerations opera-tive today in Indochina and tive today in incomina ani-Hanoi's unremitting hostility to large portions of its own people ... will generate flows of reingers.

for the foreseeable future." The panel's report contrasted with comments by a U.S. congressional delegation at a news confer-ence in Bangkok on Thursday. Rep. George E. Danielson, a Cali-fornia Democrat who headed the delegation, cited concern in the United States about the infinx of refugees and said that something had to be done to "cut off the flow."

The advisory commission, head-ed by Marshall Green, a former assistant secretary of state, said that because of its responsibility to Southeast Asian nations that have granted temporary asylum to hun-dreds of thousands of refugees, the United States should guarantee permanent settlement to a large. portion of them.

"The United States cannot shirk" this responsibility," the report said.

Of an estimated 10,000 refugees who flee Vietnam each month, about 8,000 are arriving in Thai t_{2} land, Indonesia, Singapore and Malaysia. The remainder are be-

lieved to have drowned or been killed by pirates. The United States has given per-manent residence to 504,000 Indo-chinese refugees, and 550,000 have been reserved in other countries. The majority of fliese have been Vietnamese but there have been Vietnamese, but there have been several hindred thousand from Cambodia and Laos as well.

The committee sharply rejected as a "reckless charge" the assertion of some news reports that the United States has a policy of enticing Victnamese to fice their coun-try to destabilize the Hanoi re-

But the commission concluded that as long as Hanoi refuses to accept returning refugees or threatens to punish them, there is no choice but to accept the Victnamese as legitimate political refu-gees rather than as so-called eco-

nomic refugees. The panel said that it could see no likelihood of a reduction in refngees from Vietnam as long as Hanoi treats ethnic Chinese in that country as a racial enemy and views the former South Vietnam as "subjugated nation."

The only chance of moderating Hanoi's behavior, the report said, is international pressure such as was generated at the Geneva con-ference on refuges in 1979. Inter-national disapproval then induced Vietnam to stop the forced migra-tion of more than 40,000 ethnic Chinese a more than Chinese a month.

Chinese a month. The panel also called for an ex-panded international effort to pay some of the cost of resetting Viet-namese refugees; even though it said the primary responsibility for granting them residence remains with the United States. Mr. Green told reporters that the cost to the told reporters that the cost to the United States of the refugee program is about \$1 billion a year.

Flossie, a Holstein cow, nuzzles her newborn calf, Manhar, who is a gaur, a wild ox native to India, at the Bronx Zoo.

Cow as Surrogate Mother Gives Birth to a Wild Ox

New York Times Service

NEW YORK — A baby gaur, a wild ox native to India, has been born to a Holstein dairy cow at the Bronx Zoo in a successful experiment that could ultimately increase the chance for survival of a number of endangered species. The project involved the first successful use of a domestic ani-

mal as a surrogate mother for a completely different and endangered wild species.

It marked only the second time that an interspecies embryo transfer involving a wild animal had resulted in a successful birth. The only other one known to U.S. scientists was accomplished in 1977 when a mouflon, a wild Sardinian sheep, was born to a domestic sheep at Utah State University,

The success of the project, which involved placing a gaur em-bryo in a cow's womb, is regarded by reproduction biologists as a major step toward being able to reproduce wild and endangered animals more freely in captivity.

New Stock

The embryo transferral method can produce six to eight gaurs a year from one gaur, as against the gaur's natural hirthrate of one a year. Also, the genetic deterioration of a species hy inbreeding common in many zoos may be halted through the constant impor-

The Bronx Zoo project, which was described at a news confer-ence Thursday, started in August, 1980, when the zoo acquired four Holstein cows and selected a female gaur (the word rhymes

with power) from the 16 animals in its herd. Hormones were injected to stimulate the female gaur to supero-vulate and produce more than one egg. She was mated with a male gaur, and when her oviducts were flushed, five tiny embryos were recovered. An embryo was transferred in a tronsurgical procedure through the cervix into the uterus of each of the four Holsteins.

One of the transfers did not take, and another cow aborted her fetus after five months. After 91/2 months, one of the two remained a stillborn 40-pound

fuel and water.

Twice this year he was rounded up with other youths and older men and sent far from home to work for a month in what are called new economic zones, preparing homesites for "big families who have no work and are hungry." Ho said the workers received two meak of rice and dried fish a day and were hungry all the time.

"I was also afraid they would send me to fight and will not let me write home to my sisters," he added. Miny boys of 18 are being drafted, he said, although he could not explain against whom they would be sent to fight. "One ran away with a wounded leg and hid at home, and they arrested him," Cu said. That is when I thought of escaping."

The three surviving adults from the refugee boat, including the captain — the fifth survivor is also a teen-ager - described a crossing that, even when measured against other refogee accounts, was particularly harowing.

Ships Passed

Larger ships passed, the seas were heavy and their food, water and fuel ran out. They drifted. Sometimes they used their clothing to fashion a sail; at other times they turned the makeshift sail into

a fishing not. This is typhoon season in the South China Sea, and fishing was fruitless during storms. When the winds died down and the sun shone, there was no rain to provide drinking water, and they had to light fires with planks torn from the deck to boil seawater and catch some of the steam in a tube to yield a few drops.

Cu said the captain and his group told another youth who had joined the group at sea to commit suicide so that the others could eat him. He pleaded for mercy, and the matter was put aside while the captain and his companions went to sleep. The terrified youth attacked the captain as he slept, Cu related, and in the ensuing fight the boy jumped overboard.

Two days later the voyagers caught some fish and ate. The captain, a former South Vietnamese Army sergeant, ordered them to save some to dry in the sun for the

presidium during Tito's terminal Ilness last year.

Mr. Doronjski was head of the Communist Party from Tito's death on May 4, 1980, until last October, when his term as party president expired under the rotation system devised by Tito to guarantee succession of power without divisive political struggles.

In addition to the party post, Mr. Doroniski also served in the collective state presidency of Yugoslavia, representing the autonomous province of Vojvodina. The state collective, which includes representatives from each of the six Yugoslav republics and two autonomous provinces, succeeded Tito as head of state.

strong pest-control agents. The chemicals are undergoing tests **DOW**

The seeds were collected begin-ning in the 1950s with the idea that there might be some interesting plants among the hoard that might become new cash crops for Ameri-can farmers, said Richard Powell, the Agriculture Department chem-ist who is heading the program.

Direction of Research

Few useful new crops were found, Mr. Powell said, "and we had the seeds, so we thought we would test them out." Very few anti-tumor drugs are made from plants, he said, but that may be only because most of the research of the past 30 years has sought chemical agents among the mi-crobes from which antibiotic drugs were made. An effort to find medicines from

sea creatures, carried out by Ken-neth Rinehart at the University of Illinois, not long ago turned up a substance in sea squirts that appears so far to be one of the most general and effective of anti-virus chemicals.

Among the seeds in Illinois, the most powerful agent found so far comes from an evergreen called the phunyew, a native bush of China and Japan. In first-round animal tests against a variety of cancers in mice, the plumyew chemical made colon tumors shrink or disappear altogether, extended the life of leukemic mice by at least 300 percent over the length of time they would live without treatment and doubled the lifetime of mice with the dark-colored and hard-to-treat tumors called melanomas.

Seoul's Amnesty for 1,061 **Includes 3 of Kim's Aides**

From Agency Dispotches

SEOUL - South Korea announced an annesty Friday for 1,061 prisoners, including three aides to Kim Dae Jung, the imprisoned opposition leader, and eight persons jailed for involvement in last year's rebellion in Kwangin.

The government annesty list approved by President Chun Doo Hwan did not include Mr. Kim, 56, a 1971 presidential candidate who is serving a life sentence, or any other leading dissident or op-position figure either in prison or blacklisted from political activity. The amnesty list did include 62 po-litical dissidents, however.

A government spokesman said Mr. Chun issued the elemency order to mark the anniversary Satur-day of Korea's liberation from 35 years of Japanese occupation at the end of World War II. He said is would give an opportunity to help build a just society in a spirit of national reconciliation.

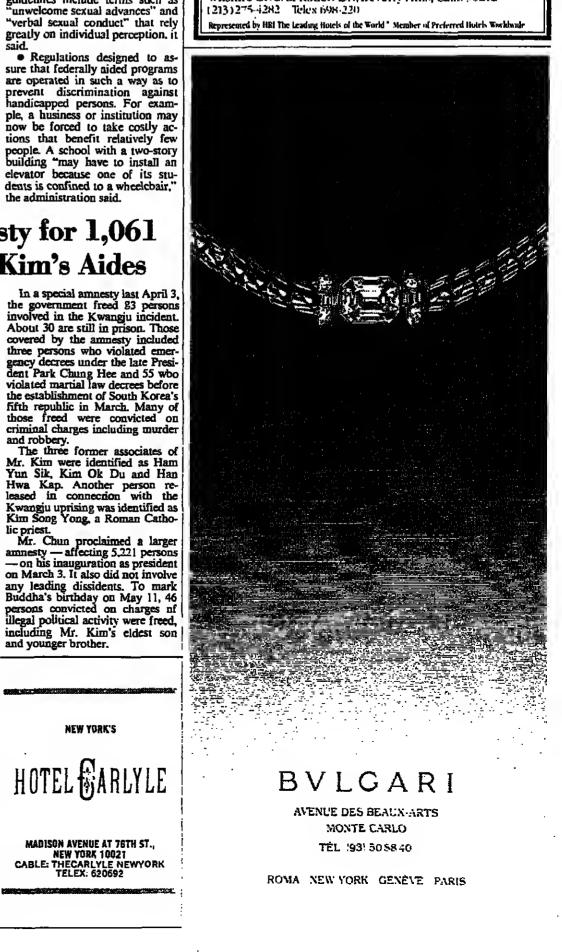

There had been speculation chiefly in Japan - that the amnesty would include Mr. Kim, but there was no mention of him hy the government. Mr. Kim had been sentenced to death by a military court on charges of sedition, but Mr. Chun commuted the sentence last January to life in prison.

Kwangju Rebellion

In May, 1980, after the govern-ment expanded martial law to crack down on political dissent, a student demonstration led to a weeklong armed rebellion in Kwangju. The official death toll reached 189, with nearly 400 wounded.

Room for Vietnam Refugees

Even though fndochinese refugees are ar-riving in the United States at a rate substan-tially helow the 168.000 annual quota set for 1981. a junkeung congressional delegation has just announced after four days in Thailand that the United States must do more to dam or divert the flow. Rep. Sam B. Hall, a plain-spoken Texas Democrat, put it this way: "The United states can't serve as a depository for every person in the world who wishes to leave his country. Word must be sent back that the United States is getting ready to draw the line."

At the same time, a four-member panel led hy former Assistant Secretary of State Marshall Green reported to Secretary of State Mar-exander M. Haig Jr., after a 25-day tour of Southeast Asia, that most of the Vietnamese boat people were legitimate refugees and the United States should continue receiving them at present or increased levels. The Green report drew a distinction between the Vietnamese, who are the vast majority of those now fleeing fndochina, and the lowland Lao and Hmong mountain people. Many of the non-Vietnamese, the report said, appeared to be leaving for economic reasons rather than fear of persecution.

There need be no clash hetween the congressmen and the Green committee, despite the differences of emphasis and tone in their respective statements. Rep. Hall is correct that the United States cannot accept "every

person in the world who wishes to leave his country," or even, perhaps, every deserving refugee. ft should also be obvious that not every person who chooses to leave his or her country wants to settle in the United States. There are enough who do, though, so that some line must he drawn, Mr. Green and his panel understand that.

The debate is over how many refugees the United States should resettle and how they should be selected. The question of who is admitted is currently focused on whether they are fleeing persecution or simply seeking better lives. Once they leave Vietnam, though, that question becomes irrelevant, because if they return they will surely be sub-jected to persecution. Protecting them in those circumstances is not unambiguously the responsibility of the United States, but it is certainly a burden that the United States could share with other countries, especially those such as France that also have a historical connection with the Vietnamese war.

To date, slightly less than half of the 1.06 million refugees who have been resettled outside Southeast Asia are in the United States. There have been some problems, but for the most part they are being well-absorbed into American society. The United States ought to be able to continue taking in refugees at a similar or slightly higher rate for the foreseeable future.

INTERNATIONAL HERALD TRIBUNE.

And Still the Palestinians

Israel has a new government. President Sa-dat has a new friend in the White House. The Sinai desert has a new peace-keeping force. And the old problem persists: What to do about the Palestinians?

Prime Minister Menachem Begin's intention to absorb a million Palestinians in the West Bank and Gaza Strip has been reinforced by the coalition bargains that will keep him in office. Mr. Sadat's rewards from peace with Israel — return of the Sinai and massive U.S. aid — leave him only a rhetorical pleader for Palestinians. And the Reagan administraton has been so busy putting out Lebanon fires it has no answer of its own.

If there is a U.S. strategy, it is to keep trying somehow to combine U.S. power, Saudi wealth and the Camp David formula to promote negotiations between Israel and the Palestinians. And the Israeli-Palestinian cease-fire in Lehanon shows what that combination might achieve. But since none of the parties want to push or be pushed very far, it has so far heen a policy more logical than practical.

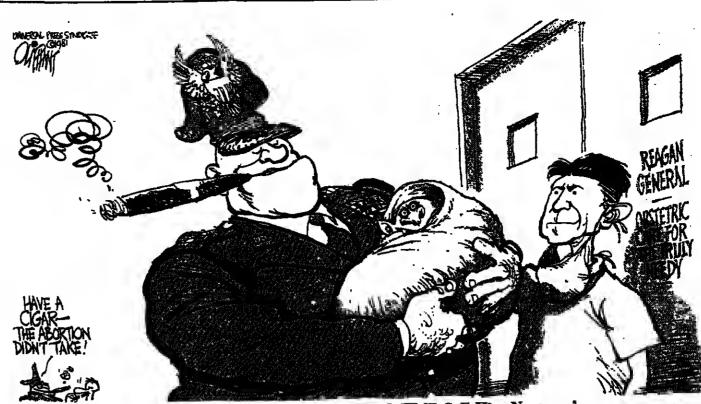

The Palestinians bear an aroused sense of nationalism, but they are not coherently led The Palestine Liberation Organization is more than a terrorist band; it now functions in some places as an informal government, dispensing services with Saudi funds. But that does not make it a representative or responsible negotiating partner. Whatever its mandate, the PLO is still not reconciled to a Jewish state in the Israeli heartland. It does not yet offer fsrael - or anyone interested in a lasting peace - an incentive to let it grow political roots. To those, like Mr. Sadat, who ask the United States to negotiate directly with the PLO, the answer of three administrations is the right one: when the PLO agrees to negotiate with fsrael. This is not a question of parlor etiquette. Talking to Israel would register a willingness to live with it in peace. That would not mean giving up claims to the West Bank. On the

contrary, Mr. Sadat and Camp David have kept the region negotiable; rejecting that course only gives the Israelis time to make partition physically impossible.

Saudi Arabia and Jordan, too, need constant reminders that time runs against them. The Saudis may have strong domestic rea-sons for standing with the PLO even if it does not bend. But they have powerful security reasons for recognizing Israel and dragging the Palestinians along. Without an end of the Arab-Israeli conflict, they cannot have a lasting alliance with the United States against Soviet influence. And granting Israel a sense of security, as Mr. Sadat recognized, is the essential starting point.

As for King Hussein, he may not relish a Palestinian regime in the West Bank that will clamor to expand into Jordan. But negotiations would recognize his security concerns.

The myopia in Arah quarters, however, does not justify the Begin government's course. It has been retreating from a commitment to give the Palestinians "full autonomy" and to leave the sovereignty of the West Bank truly open. The Israelis are right to demand recognition, but they are wrong, while militarily invulnerable, to give the Palestini. ans no incentive to overcome their sense of loss and frustration. If Mr. Sadat could risk a journey to Jerusalem, the Israelis can be asked to risk offering genuine autonomy to Palestinians who accept them and agree to provide for their security. It may sound futile for the United States merely to lecture all parties in this vein. But with Israel, Egypt, Saudi Arabia and Jordan vesting so much of their security in U.S. support, and even the PLO looking for legitimacy in U.S. eyes, the clear reiteration of wellreasoned U.S. positions could do much to shape the diplomatic environment - and also to condition U.S. attitudes. When there is nothing better to do, sharp words, too, can be a mark of friendship.

Thank You, Dr. Weinberger. I Think We'll Call Him Neutron."

Sorting Through the Neutron Muddle

By Flora Lewis

PARIS — The main thing wrong with President Reagan's decision to go ahead with the neutron weapon is that it hasn't been clearly enough explained. The argument about the weapon has been muddled from the start hy emotional misconception and political clumsiness.

It is essentially a defensive weapon, for battlefield purposes comparable in a way to anti-aircraft missiles. The military want it because its existence can force change in Soviet armor tactics. There is a limit to the effectiveness of conventional anti-tank weapons against densely massed tanks which the Red Army can field. The best way to protect tanks facing neutron mis-siles is to spread them out, which then in-creases usefulness of conventional defense.

Nothing Surprising

There is nothing surprising in the re-minder that Leonid Brezhnev told visiting Americans a couple of years ago the Rus-sians had worked on the bomh and decid-ed against producing it. Both the depth of their buffer their buffer zone and their tremendous preponderance in tanks make it of no particular military use to the Soviets. They don't have to plan against a huge force of tanks invading vital territory across any border, not from the West, Central Asia or China.

It is the West which must guard against that threat, specifically on the north Ger-man plains. The announcement that the weapon will be stockpiled only in the United States is a hit of diplomatic sleightof-hand, ff the weapon were ever to be de-ployed on a front line, it would be in Germany. As Defense Secretary Caspar Wein-berger has said, once it is in the arsenal it can rapidly be flown to the battlefield.

and reduction. That is the most present need, and it would give Americans and al-lies a much better basis for judging what weapons their money should buy if the read with the start of th Obviously, the political fallout of the de-cision to huild it is much reduced, howevbe made on the basis of strategic doctrine, goal were defined. er, by withholding deployment oow. The pro forma complaints from the West Gerreliance on the current theory that the threat of wiping out Soviet cities with the --Letters------

man and other allied governments can be taken as camouflage against their domestic critics. West German Chancellor Helmut Schmidt was disappointed when President Carter suddenly put off production, and he was badly burned by the public argumeni beforehand.

The last thing he would really have wanted now was a revival of the Alphonse and Gaston-kind of "consultations" be had with the Carter administration. Then, Washington said it would huild the bomh only if the West Germans declared they wanted it and would deploy it, and Bonn said it would only agree if Washington took the initiative and hlame for the decision

President Reagan has handled the issue more decisively, and there is little douht that allied leaders are discreetly grateful for that.

The one logical ground for opposing the weapon while accepting the rest of the atomic arsenal and the strategy of deterrence is precisely that it is more evidently defensive, more selective and less destructive than other tactical nuclear arms, Therefore, criocs say, it might more readi-ly be used, lowering the threshold for atomic war without in any way diminish-ing the danger of escalation to doomsday.

That is a matter of military doctrine. It depends oo whether you really believe hig weapons would never be used but small ones might, and whether you believe top leaders would never delegate the decision to use any size atomic weapon to field commanders.

It illuminates the issue to see how the French are facing it. They are developing the neutron weapon hut won't definitely decide whether or oot to go on to production until late oext year. The decision will

Reagan Crystal Ball

By William Suffre WASHINGTON - Here is the learless, forecast for Plant II of the Reagan Revolution wherein ideas that were considered jejune in January will this fall, he come the top 10 items on the na-tion's domestic agenda. THE NEW YORK TIMES.

Workers of the World, United

There is some genuinely good news about the United Nations that we missed when it happened in June. The International Labor Organization, a venerable member of the UN system, has been turned around with a vengeance. You remember the ILO. That's the agency in which things got so bad - so tyrannized by a Communist-Third World majority, so unabashedly pro-Soviet in policy and procedure - that in 1977 Jimmy Carter withdrew. By 1980 the organization, properly sobered by the U.S. absence, had altered its ways enough to permit the United States to return. But that was only a taste of what was to come.

In 1977, a small group of Soviet workers had attempted to organize an authentic free trade union, one responsive to their interests in a way that the official unions of the "workers' paradise" have never been. For their pains, this hrave band paid heavily. being sent to psychiatric hospitals and the like. The International Confederation of Free Trade Unions and the World Conference of Lahor took up their case, charging the Soviet Union with violating the hasic fLO convention on freedom of association. This is the same Convention 87 invoked, successfully, last year hy Poland's Solidarity. The complaint worked its way through the organization, and in June the fLO's governing body issued the first rebuke it had ever delivered to the Soviet Union.

No more than other international agencies can the fLO reach inside the borders of a sovereign state to enforce its reprimand. So different are the Soviet and Polish contexts, moreover, that it is idle to believe the suppressed Soviet group is a precursor to Solidarity. But it is cause for genuine satisfaction that the Soviet workers have been stood up for hy the organization created to advance the cause of social justice through the improvement of labor conditions around the world. International organizations are supposed to work that way. They rarely do.

In the 1970s U.S. withdrawal from the fLO was seen by many as alarming and self-defeating. But the AFL-CIO — lahor has its own separate voice in fLO proceedings, along with management and government pushed hard for withdrawal, and it was right. When the United States did return, it was in a position to put through procedural changes, including secret balloting and prescreening of intrusive political resolutions. These allowed the organization to get hack to the work that Samuel Gompers had in mind when he established the fLO in 1919. THE WASHINGTON POST.

In the International Edition

Seventy-Five Years Ago August 15, 1906

WASHINGTON - The Department of Commerce and Labor announced that after an investigation of the principal manufacturing and mechanical industries in the United States, it is shown that the rate of wages is increasing faster than the cost of living, so far as the price of food is concerned. The purchasing power of hourly wages in 1905 was 5.88 percent and that of weekly wages 1.4 greater than the average for the 10 years preceding 1900. The difference between the increase in the purchasing power of hourly and weekly wages is due to a reduction of the hours of labor. The purchasing power both of hourly and weekly wages in 1905 was 1 percent higher than in 1904.

<u>۲</u>

Fifty Years Ago August 15, 1931

NEW YORK - While New York detectives were husy unraveling details of what was admitted to be a lovers' quarrel, Roy T. Yates, youngest member of the New Jersey State Senate and a prominent banker of Paterson, was lying in hospital here with a critical bullet wound in his abdnmen. He was shot early today in the West 89th Street apartment of Miss Ruth Javne, a pretty young blonde with whom he had been friendly, according to her admissinn, for some years. Semi-hysterical, the girl was taken into custody hy detectives. "I knew he was married," she said, "and had a wife and children in Paterson, hut I understood he was separated from his wife, although not divorced."

Student's Plight

Your readers will doubtless be aware of the punitive sentence passed on Rudolf Battek (IHT, July 29) and the planned mass trial of Charter 77 human nghis activ-ists in Czechoslovakia. I would like to urgently draw your attention to the plight of a young Czechoslovak student, Lenka Cvrckova, held in Prague for her involvement in the founding of the Independent Student Associations (NZS) in Poland.

While studying in Warsaw, Lenka Cvrckova played an active part in student life by helping to make programs for the internal broadcasting network. In early 1981 she went to Lodz, scene of the largest of the student sit-ins in demand of the right of independent association, and became an editor of the student broadsheet The Strike.

For this activity she was de-tained by the Polish authorioes on Feb. 19 and deported.

Back in Czechoslovakia, she was immediately imprisoned, first in Ostrava and then in the Ruzyne jail in Prague. She has now been charged under Articles 98 and 99 of the Czechoslovak criminal code, potentially major charges of sub-verting the Czechoslovak states and actions likely to damage a friendly Socialist country. The first charge seems difficult to justify since by all accounts Lenka Cvrckova confined her activities tn within the Polish student community. As to the second it should be noted that the NZS associations are now fully legal in Poland and operate in an open, nonpolitical and constructive manner in de-fense of student interests. Also, since the Polish authorities declined to press definite charges, one wonders what grounds the Czechoslovaks have for their accusations of political crimes nn foreign soil?

E.M. SWITALSKI. London.

Death of a Poet

On June 22, Sayid Soltanpour was executed by firing squad (IHT, June 24). One of Iran's leading poets and playwrights, Mr. Soltanpour was arrested in April and charged with illegal trafficking in foreign exchange. If, in fact, such a crime had been committed, death hardly seems the appropriate punishment. Yet, even more alarming, his execution has impelled the en-tire intellectual and writing community of Iran to seek hiding - a development which suggests Mr. Solianpour's real crime was the frank expression of opinions, and his sentence a death knell for those who have openly criticized the policies of the present Iranian regime. Earlier this year, Mr. Soltanpour

joined approximately 100 distinguished writers and intellectuals in

signing and circulating an open letter to the people of Iran. This letter was supportive of the revolu-tion hut highly critical of the Iranian government's suppression of human and democratic rights and of its hlatant disdain of art and culture. Within the past year in

Iran, a virulent campaign has been waged hy the clergy-dominated government to silence political discussion and censor cultural expression. Universities, libraries, and museums have been closed, books have been destroyed and the practice of all art forms threatened. Journalists have been removed from their oewspapers. Independent publishing houses and professional associations, such as the Writers Association of Iran - on whose executive board Mr. Soltanpour served — have all been taken over by the Iranian government. Poets, scholars, journalists and

publishers now fear for their lives. We, writers and scholars from many countries and of various political perspectives, join in our concern for the precarious existence of these men and women. The pall that has descended upon a vibrant cultural and intellectual life should not be tolerated by anyone who values the free exchange of ideas as an irreducible human right. We appeal to our colleagues in all naoons to urge their governments to protest the harassment and repres-sion of the Iranian intellectual community and to demand that the rulers of Iran account for this indefensible violation of the right to cultural integrity and peaceful expression

This letter was signed hy 95 writers, for the American Center of PEN International

New York.

some sentences in my hiography of Maria Callas from "Callas" by by John Ardoin and Gerald Fitzger-ald. What he failed to report was that all three drafts of the manuscript were thornughly read, vetted and approved by John Ardoin be-fore a word was set in print. Mr. Ardnin made many comments, suggestions and corrections for which I am grateful and which are all incorporated in the published version. Indeed. Mr. Ardoin is quoted on the jacket itself describing the book as "surely the finest biography of Callas ever written." None of this appears in the report. As for the two examples of similarities between the two books, they both come from reports of performances in 1955. I was not present at these performances --one of the reasons being that I was 5 years old ot the time --- and had

therefore, of necessity, to use the reviews of the day as my sources. as indeed did Mr. Fitzgerald. These newspaper reports, as well as book-length studies of Callas, are fully acknowledged in the eight pages of source notes in my book.

As for the alleged similarities between my book and that of Henry Wisneski, since Mr. Wisneski mself discounts the significance of any such similarity, it is unnec-

essary for me to do so as well. All hiography, to say nothing of history, is obliged to rely on earlier work. But at every point, throughout the book, I have attempted to distinguish between my use of secondary sources and my own three years of primary research, inter-viewing friends, relatives and critics who knew Miss Callas, and drawing from previously unpublished letters and tapes hy Miss Callas herself.

A. STASSINOPOULOS. New York.

Right to Run

Without holding any particular haef for President Reagan's poli-cies in general, I still wonder whether David. S. Broder (IHT, Aug. 8-9) is being altogether fair to Mr. Reagan over his pursuit of the presidency in 1968. Surely, any bona fide candidate has an inherent right to run for any office. Had Mr. Reagan been successful nn that occasion, might not the United States have been spared the whole trauma of Walergate? ROBERT A. IMLAY.

London.

Is It Mellow?

George F. Will's article (IHT, Aug. 4) strikes me as an exception-al piece of critical ignorance. Regarding the title question, "When Art is Absurd, Whai's in Store for the World?" I would refer Mr. Will the world? I would react when with to the writings of Theodor W. Adornn, who in his "Philosophy of Modern Music" (1948) responded to such queries as follows:

The general public, totally cut nff from the production of new music, is alienated by the outward characteristics of such music. The deepest currents present in this

music proceed, however, from exactly those sociological and anthropological foundations peculiar to that public. The dissonances which horrify them testify to their own conditions; for that reason alone do they find them unbear-

able.'

THOMAS LEVIN. Flims Waldhaus, Switzerland.

Consider Consequences

l am appalled by the recent ac-tion taken by the American air traffic controllers' union. Their demands are both untimely and unrealistic. What troubles me further, though, is the "support" afforded them by other air traffic controllers around the world; that these persons feel it is their place to become involved in what clearly is an internal American affair with deep political and legal implications is absurd. Throughout the United States, citizens are "tightening their belts" and accepting modest salary increases in an effort to belp stabilize the economic state of the U.S. government and, consequently, the country. The election of President Reagan and, more recently, the overwhelming success of his fiscal policies in Congress, show that the majority of Ameri-cans have accepted this policy in

full spirit. The opinions, then, of non-Americans, namely non-American air traffic controllers, oo such eco-nomic issues are neither warranted nor relevant. By most accounts, all air traffic cootrollers purport to be deeply concerned with the state of affairs in U.S. skies. Perhaps, then, they should stop and carefully con-sider possible consequences before continuing with their present course of action. After all, the ultimate resonsibility for any U.S. air accidents will rest on those American men and women who left their posts and/or shirked their duties. I

should not think that their coun-terparts around the world would welcome the then valid accusation that they were, in effect, accom-plices in causing such a tragedy. DAVID J. MAZZO. Lausanne.

time administration from Commerce to Transportation. The "say percahinet" idea has already been put into effect informally with five Cahinet councils, but Congress has nnt yet caught on to the change. 7. Labor. The air controlled have enabled the Reagan mer H

bask in the warmth of legal unionbusting, and no sign of mency will be shown nnull the stokers adout defeat; then, some lenicacy can be expected. Organized labor is more floor guaranteed by the wine Bacon Act, and with reson the Reagan men will move to modify this inflationary legislation soon. 8. Military manpower With pay increases, the military is how meet-

ing its needs; after much anguish from the Pentagon, the Reague men will decide to eliminate draft registration. Educational incentives will be given infantynica under a program known is "grants for grunts."

9. The anti-abortion povement The president will support "a" constitutional amendment on ining life abortion, but not "the" amendment. In essence, Mr. Reagan wants to returning power to make anti-abortion aws to the states. That return to load option should infuriate just abuit everybody, but might be the democratic

way out. 10. The Balance Budget Amendment. This is inswe as The Monster Approaching the Capital. stimulated by state legislatures which have called for a constitutional convention to amend the Constitution to require Congress to balance the budget. Under this amazing grassroots pressure, Orna Hatch, a Republican from Utah, and 47 other senators have spor-sored a convention avoiding amendment not only to balance the budget but to make permanent

tax limitations. The reader is now so deeply in the know that he may never get out. For those who want to so press friends with a grasp of Reaganomenciature:

Sneer at all references to the ing for television celebrities, but think-tankese for a rehance of school, union, church, business, and above all family, to undertak more responsibility for liaison be tween individual and society. 1981, The New York Times.

Bal Arts Travel Leisure

Meeting Hemingway

by Gabriel Garcia Marquez

recognized him immediately, passing with his wife Mary Weish on the boule-vard St. Michel in Paris one rainy spring day in 1957. He walked on the other side of the street, in the direction of the Luxembourg Gardens, wearing a very worn pair of cowboy pants, a plaid shirt and a ballplayer's

The only thing that didn't look as if it be-

-i de only thing that didn't look as if it be-ged to him, was a pair of metal-rimmed asses, tiny and round, which gave him a pre-nature grandfatherly air. He had turned 59, and he was large and almost too visible, but he didn't give the impression of brutal strength that he undoubtedly wished to, because his hips were narrow and his legs looked a little emaciated above his coarse tumberjack shoes. He looked so alive amid the second book He looked so alive amid the second and book-stalls and the youthful torrent from the Sor-bonne that it was impossible to imagine he had but four years left to live.

For a fraction of a second, as always seemed to be the case, I found myself divided between my two competing roles. I didn't know whether to ask him for an interview or to cross the avenue to express my unqualified admira-tion for him. But with either proposition, I faced the same great inconvenience. At the time, I spoke the same indimentary English that I still speak now, and I wasn't very sure about his hullfighter's Spanish. And so I didn't do either of the things that could have spoiled just that moment, but instead cupped both hands over my month and, like Tarzan in the jungle, yelled from one sidewalk to the other: "Maaaccestro!"

Ernest Hemingway understood that there could be no other master amid the multitude of students, and he turned, raised his hand and shouted to me in Castillian in a very childish voice, "Adióoos; amigo!" It was the only time I saw him.

At the time, I was a 28-year old newspaperman with a published novel and a literary prize in Colombia, but I was adrift and without direction in Paris. My great masters were the two North American novelists who seemed to have the least in common. I had read everything they had published until then, but not as complementary reading - rather just the opposite, as two distinct and almost naturally exclusive

forms of conceiving of hteranure. One of them was William Fanikner, whom I had never laid eyes on and whom I could only imagine as the farmer in his shirtsleeves scratching his arm beside two little white dogs

in the celebrated portrait of him taken by Car-tier-Bresson. The other was the ephemeral man who had just said goodbye to me from across the street, leaving me with the impression that something had happened in my life, and had happened for all time.

I don't know who said that novelists read the novels of others only to figure out how they are written. I believe it's true. We aren't satisfied with the secrets exposed on the sur-face of the page: We turn the book around to find the seams. In a way that's impossible to explain, we break the book down to its essential parts and then put it back together after we understand the mysteries of its personal clockwork.

The effort is disheartening in Faulkner'sbooks, because he doesn't seem to have an orgamic system of writing, but instead walks blindly through his biblical universe, like a herd of goats loosed in a shop full of crystal. Managing to dismantle a page of his, one has the impression of springs and screws left over, that it's impossible to put back in their original state.

Hemingway, by contrast, with less inspira-tion with less passion and less craziness but with splendid severity, left the screws fully exposed, as they are on freight cars. Maybe for that reason Faulkner is a writer who has much to do with my soul, but Hemingway is the one who had the most to do with my craft — not simply for his books, but for his astounding knowledge of the aspect of craftsmanship in the science of writing.

In his historic interview with George Plimp-ton in the Paris Review, he showed for all time

- contrary to the Romantic notion of creativity --- that economic comfort and good health are conducive to writing; that one of the chief difficulties is arranging the words well; that when writing becomes hard it is good to reread one's own books; in order to remember that it always was hard; that one can write anywhere so long as there are no visitors and no telephone; and that it is not true that journalism finishes off a writer, as has so often been said - rather, just the opposite, so long as one leaves it behind soon enough.

"Once writing has become the principal vice and the greatest pleasure," he said, "only death can put an end to it."

Finally, his lesson was the discovery that each day's work should only be interrupted when one knows where to begin again the next day. I don't think that any more useful advice has ever been given about writing. It is, no

Author Gabriel Garcia Marguez.

more and no less, the absolute remedy for the most terrible specter of writers; the morning

agony of facing the blank page. All of Hemingway's work shows that his spirit was brilliant but short-lived. And it is understandable. An internal tension like his, subjected to such a severe dominance of technique, can't be sustained within the vast and hazardous reaches of a novel. It was his nature, and his error was to try to exceed his own splendid limits. And that is why everything su-perfluous is more noticeable in him than in other writers.

His novels are like short stories that are out of proportion, that include too much. In contrast, the best thing about his stories is that they give the impression something is missing, and this is precisely what confers their mystery and their beauty. Jorge Luis Borges, who is one of the greatest writers of our time, has the same limits, but has had the sense not to try to surpass them.

Francis Macomber's single shot at the fion demonstrates a great deal as a lesson in hunt-ing, but also a summation of the science of writing. In one of his stories, Hemingway wrote that a bull from Liria, after brushing past the chest of a matador, returned like "a cat turning a corner."

I believe, in all humility, that that observa-

Ernest Hemingway, with wife Mary, in 1959: "Once writing has become the principal vice and the greatest pleasure, only death can put an end to it," he said.

tion is one of those inspired bits of foolishness which come only from the most magnificent waters. Hemingway's work is full of such simple and dazzling discoveries, which reveal the point at which he adjusted his definition of literary writing: that, like an iceberg, it is only well grounded if it is supported below by seven-eighths of its volume.

Herald Tribune

That consciousness of technique is unques-tionably the reason Hemingway won't achieve glory with his novels, but will with his more disciplined short stories. Talking of "For Whom the Bell Tolls," he said that he had no preconceived plan for constructing the book

bot rather invented it each day as he went along. He didn't have to say it. It's obvious. In contrast, his instantaneously inspired short stories are unassailable. Like the three he wrote one May afternoon in a Madrid pension, when a snowstorm forced the cancellation of a hullight at the feast of San Isidoro. Those sto-ries, as he himself told George Plimpton, were "The Killers," "Ten Indians" and "Today is Friday," and all three are magisterial. Along those lines, for my taste, the story in which his powers are most compressed is one of his shorest ones, "Cat in the Rain,"

Nevertheless, even if il appears to be a mockery of his own fate, it seems to me that his most charming and human work is his least successful one: "Across the River and Into the Trees." It is, as he himself revealed, something that began as a story and went astray into the mangrove jungle of a novel. It is hard to understand so many structural cracks and so many errors of literary mechanics in such a wise technician - and dialogue so artificial, even contrived, in one of the most hrilliant goldsmiths in the history of letters.

Neekem(

When the book was published in 1950, the criticism was fience hut misguided. Hemingway felt wounded where he hurt most, and he defended himself from Havana, sending a passionate telegram that seemed undignified for an author of his stature. Not only was it his best novel, it was also his most personal, for he had written it at the dawn of an uncertain autumn, with nostalgia for the irretrievable years already lived and a poignant premonition of the few years be had left to live. In none of his hooks did he leave much of himself, nor did he find — with all the beauty

and all the tenderness — a way to give form to the essential sentiment of his work and his life: the uselessness of victory. The death of his protagonist, ostensibly so peaceful and natural, was the disguised prefiguration of his own suicide.

When one lives for so long with a writer's work, and with such intensity and affection,

by Christian Williams

TEPAL - The Raven Bar. Marion

one is left without a way of separating fiction from reality. I have spent many hours of many days reading in that cafe in the Place St. Michel that he considered good for writing because it seemed pleasant, warm, clean and friendly, and I have always hoped to find friendly, and I have always hoped to find again the girl be saw enter one wild, cold, hlowing day, a girl who was very pretty and fresh-looking with her hair cut diagonally across her face like a crow's wing.

Page 5W

"You helong to me and Paris helongs to me," he wrote for her, with that relentless pow-er of appropriation that his writing had. Everything he described, every instant that was his, belongs to him forever. I can't pass by No. 12 rue de l'Odéon in Paris without seeing him in conversation with Sylvia Beach, in a bookstore that is now no longer the same, killing time until 6 in the evening, when James Joyce might

happen to drop hy. On the Kenya orairie, seeing them only once, he became the owner of his huffaloes and his lions, and of the most intimate secrets of hunting. He became the owner of hullfighters and prizefighters. of artists and gun-men who existed only for an instant while they became his. Italy, Spain, Cuha — half the world is filled with the places that he appropriated simply by mentioning them.

In Cojimár, a little village near Havana where the solitary fisherman of "The Old Man and the Sea" lived, there is a plaque commemorating his heroic exploits, with a gilded bust of Hemingway. In Finca de la Vigia, his Cuhan refuge, where he lived until shortly before his death, the house remains intact amid the shady trees, with his diverse collection of books, his hunting trophies, his writing lectern, his enormous dead man's shoes, the countlesss trinkets of life from all over the world that were his until his death, and that go on living without him, with the soul he gave them by the mere magie of his owning them.

Some years ago, I got into the car of Fidel Castro — who is a tenacious reader of literature — and on the seat I saw a small book bound in red leather. "It's my master Hemingway." Fidel Castro told me. Really, Hemingway continues to be where one least expects to find him -20 years after his death -asenduring yet ephemeral as on that morning, perhaps in May, when he said "Goodbye, anio" from across the Boulevard St. Michel.

Colombian novelist Gabriel Garcia Marquez's novels include "One flundred Years of Solitude" and "The Autumn of the Patriarch." This article was translated by Rundolph Hogun of The New York Times Cultural news staff. *1981 The New York Times

Lady of the Lost Ark

What's Cricket — and What Isn't

tronic scoreboards. Nor are there any Dallas Cowboy Cheerleaders. The game is observed by Jeffrey Robinson and played in librarylike silence.

'How many games break for hanch, then for tea, with neither team's winning?"

"What happens is that when the batter hits the pitch, he has the choice of running to the other wicket, exchanging places with the batsim 1 They are put out when the bowler bowls a wicket or when the wicket keeper gets the ball and knocks the little stick off the top of the wicket before the batter can return to his batting spot, known as the "crease." Then, if one team gets far out in front, they can declare."

equal to baseball's grand-slam home run. "Going for four is absolutely the very best a batter can do," the explanation is, "except when he is going for six which is two runs no for better." Nicely enough, the game is played both hy amateurs and professionals. The pros are called "players," the amateurs, "gentlemen." Until about 20 years ago, players and gentle-men on the same team did not use the same dressing room. Today, some "players" are taking their place with the gentry by staying at bat for seven hours and earning salaries up-ward of £50,000. They may not endorse soft drinks, bul then only a few years ago it was unthinkable that a cricket player could carn more than expenses. The fact that cricket around the world is competing for big dollars with big money sports might be one reason. The game is played extensively in almost all of the former British colonies - but not the United States. A few years ago a promoter named Bert Smith tried to introduce it in the United States. He found out the hard way that North American sports fans really do want electronic scoreboards and Dallas Cowboy cheerleaders. Even if there is an organization called the U.S. Cricket Association with a reported 150 teams, Smith has admitted that it will be a while before Johnny will trade in his Louisville Slugger for a "proper bat." In the meantime, Sunday fans head to the Oval or Lord's or any of the other grounds throughout the Empire for "an elegant after-noon in the sun." True, there are no bot-dog vendors or peanut-sellers, hut in the Oval giftshop there are such souvenirs as embossed tea towels and official Surrey Cricket Club cuff links. Then, too, it's worth noting that affection for the game runs so deep that simply by dial-ing 154, you can hear the Cricket Information Service say such things as, "Somerset 361 for four wickets, Gloucestershire 18 for 10 overs and no wickets. Worcestershire 115 for nine wickets and 54.3 overs, Hampshire 143 for three wickets and 27 overs."

ONDON - Unlike baseball, which might look to a foreigner like nine men in pajamas doing a lot of running around, cricket is 11 men in starched white shirts, pressed slacks and Sunday manners who don't appear to be doing very much of anything.

It is, the English like to say, "a very elegant game." If nothing else, it is certainly unique. How many other games break for lunch, then again for tea and can end, after five days, with neither team's winning?

"You start with two wickets," the gentleman in the next seat quictly explained to me one recent Sunday at the Oval. (A large, tired, redbrick structure, the Oval is to London what Ebbets Field used to be to Brooklyn.) There are wood-paneled rooms where you can sit inside at card tables and sip tea while watching the match over the heads of the crowds who sit outside in bleacher seats, sipping tea.

No matter where you sit, every seat is out in left field, so this is not a lot of fun for the nearsighted. There are no instant-replay elec-

you a

You're told, "Who can win until the game is over?" And then you get raised eyebrows and a remark about how America might have otherwise been one of Britain's finest dominions.

"So you start with two wickets," the explanation goes. "They're three little poles sticking up exactly 22 yards from another set of three little poles. You then put II men on the field, plus two batsmen. One of those 11 men is a bowler and he pitches the ball at one of the batters and the batter tries to hit it in any direction he can to defend his wicket. If the ball hits the wicket, that's called a wicket also."

You nod. "But which team is winning?" He continues. "There are 10 wickets per in-

ning and normally two innings per game. But you also play a number of overs as well. There are six pitches to an over and if you play 12. overs to an inning, that's 72 pitches or 10 wickets, whichever comes first. In some matches you might play 10 wickets per inning, two innings per game, one game per test and five tests per series

"But does anyone win?"

You ask, "Declare what?" He answers, "That they're very far out in front. It means that they feel they are so far ahead they can't really be beaten, so they give up getting any more runs and let the other team have a chance. It's a very civilized idea."

As any Britisher can tell you, cricket is in-deed a very civilized game. The unpires dress like surgeons in long white coats. On chilly days the players wear handsome white tennis sweaters. There are no numbers on their backs, so even with a scorecard it's tough to tell who's who. But they each play a specific position and each position has a specific name.

"Square leg" is the man standing to the left of the wicket keeper, who is really the catcher. "Point" is the man to the right of the catcher, like a first baseman. The "slip" stands next to point. And "silly mid-on" with "silly mid-off" stand directly in between point and the wicket keeper. The name derives from the fact that

"standing there is a pretty silly place to be." Cricket appears on British television, and games can also be heard on radio. But like true aficionados everywhere, the real fan treks to the grounds because there is something about the excitement of the crowd. And at a cricket match, the excitement is very special. There is even an occasional outhurst of enthusiasm. When something spectacular happens, the crowd reacts en masse with a sotto voce "Jolly good" or a mumbled "Howzat."

When someone bats a "century" (hits 100 runs) he is the object of joyous upheaval — a mildly applauded "Good show." That's also the reaction when a batter does the best thing he can, which is called "going for four." It is

Except they don't tell you who's winning.

The SKD Revue: The Kitschiest Show in the World?

by Donald Kirk

OKYO --- It may be the schmaltziest, kitschiest show in the world. From the moment the curtain goes up on a line of more than 20 girls clad in bathing suits and top hats, kicking their legs, swaying rythmically and singing "Somewhere Over the Rainbow," you know it's going to be that kind of an afternoon. Next they run through a few Japanese-siyle dances in costume that must be described as "native," and they get even more "native" in a routine from the Ryukyn Islands complete with a temple and the sound of strange drums and roody instruments.

They break it all up with what has become a classic for the Shochiku Kokusai Revue, opened in 1928 in total imitation of the chorus-line song-and-dance shows then all the rage in the United States and Europe. Girls in jungle outfits are dancing prettily when thun-der starts to toar and the whole backdrop, with swaying bridge, grass huts and pahn trees, begins to buckle ominously and, with 30 tons of water spewing forth to prove it, collapses. It's a flood scene - one of a repertoire that also includes fire sequences of unvarying delight to hundreds of kids in the Kokusai thener in the city's distinctly lowbrow Asakusa district.

The show, with taped music and a 12-piece onchestra, remains as big and brassy as it was in its glory days in the 1950s and 1960s. All

SKD in traditional Japanese sequence.

told, approximately 100 girls rush on and off stage, alternating between the most conventional local and foreign styles.

"There are many types of people in the audience, and we have to interest all of them." says director Motohiko Yamada, who has been whipping together much of the show for the past five years. "We have foreigners, students, chidren, middle-aged men and women from the countryside - it's very hard to appeal to all of them." It's so hard, in fact, that the Shochiku Revue - known popularly as SKD - is running regularly in the red and may not survive another season.

SKD in kicky, Rockettes-like line-up.

If the SKD is on the brink of collapse, though, you wouldn't guess it. On a recent weekday, more than 2,000 people crowded into the show - not enough to fill the 3,500-seat theater, built in 1937 and perhaps the largest in Asia, but more than attended a few years ago.

In fact, Yamada cites statistics hinting at just a chance for a comeback as the best reason not to change a tried if somewhat cracking format. "It's a show for sightseers, and you can't take a chance on a change," he says.

The sense of tradition lives on among the show's stars as well. "Our show will last fores- the press gets excited. The show must go on."

says Hiromi Kasuga, who has been dancing for Schochiku (then the name of the film and television company that produces it) for 20 years. "We are trying to create a stage which will be understandable to the entire aulience so everybody can enjoy it together."

She changes costumes 10 or 12 times during a typical performance — but invariably plays male roles. Opposite her in many of the sequences is Yoko Fujikawa, in her 14th year as one of the revue's top "female" stars.

"For years we have danced together," says Fujikawa, still wearing the elaborate headpiece and frilly butterfly wings she dons for the final scene. "Our dressing room is filled with flowers after every performance. We get letters

It was while watching SKD shows that Kasuga and Fujikawa both decided to give up budding careers as ballerinas and attend the

Says Kasuga: "When you join the SKD, you give up everything else - marriage and family. You are here for life. The SKD can never disappear."

Perhaps that is why the current revue carries a dance medley entitled, "The Show Must Go On." with old-time Western musical hits. "We've bad both good times and bad times." says Yamada in a philosophical mood. "If we had only good times, nobody would suffer. 1 feel no fear, and the actors don't worry. Only

Ravenwood with her elbows on the table, sleeves rolled halfway up. That crooked grin. That careless ponytail. The crowd cheers as she drinks her competitor under the table. She gathers her winnings, but a shadow looms on the wall. A shadow larger than life, but not larger than memory. "Indiana Jones! I always knew some day

you'd come walkin' back through my door!

Karen Allen: The girl next door.

OCEAN CITY, MD. - The Wild Goose Chase Restaurant, Karen Allen with her elbows on the table, sleeves rolled halfway up. That crooked grin. That careless ponytail. She reaches for her glass, and her companion lurches back. A shadow looms against the wall. It's the same size as life, and exactly the same size as the waiter. Because it is the waiter.

"May I have another iced tea?" she says. perplexed. "I seem to have knocked this one on the floor."

Marion Ravenwood, the kidnap-prone, nightgowned lady buccaneer of the summer hit "Raiders of the Lost Ark," is currently a 30foot-high vision of man-killing sass in 1,100 American and British movie theaters.

Karen Allen, however, is the girl next door. Or at least she was, if you happened to live in Glenn Dale, Md. Or went to DuVal High School, where she was a student officer in the class of '69. In those days she wanted to be a writer, and so naturally she went to design school in New York for a year and a half. This led naturally to her running a houtique on the campus of the University of Maryland. She had hardly ever seen a play, so of course she soon joined the Washington Theater Lab. Her first auditioo was for a play commissioned to mark the 100th anniversary of St. Columba's Episcopal Church. The play went to England, and she with it.

After 21/2 years of studying drama and bving the artistic life, she moved on to New York Four months after that, she won a part in the movie "Animal House." That led to roles in "A Small Circle of Friends," "Cruising" and television's "East of Eden."

Nevertheless, Karen Allen is for some reason still 5 feet 5 inches tall. And while Marion is shouting her lungs out in a blood-spattered thriller. Karen is visiting her parents at the shore. Her father is Tom Allen, retired from the FBI; her mother is Patricia Allen, a

Allen's yell, learned for "Ark."

schoolteacher. And Karen Allen is driving the family car, a 1970s-vintage. sun-faded, twotoned American dinosaur.

Something is wrong here. Where is the Mercedes convertible with the celebrity license plate? Where is the Hollywood herald, slipped five hucks to precede her hreathlessly into the restaurant ("Miss Allen is about 10 arrive!")? No, she is demonstrahly and unequivocally alone. Absent of escori, free of flack,

Yet she is the lead female in a motion pic-ture that grossed S68 million in its first 38 days in the United States. Therefore famous, and how to ask it? - extremely rich?

"Oh," she corrects gently. "I wouldn't say extremely." But come now, surely Miss Allen concedes her fame? She grins - slender and happy and quietly ravishing. No. she is not Marion in the "Ark," hig and vulgar and loudly seductive. But when she laughs, this is no regular grin and these are no regular eyes. This is what Steven Spielberg Saw at the screen test. And then we are allowed to see what director Spielberg saw during filming. "My first reaction when I saw the film was

delight," she says. "It made me feel like a 5vear-old again. Of course, what I see in the movie is not the scene the audience sees. I see a series of memories. How hot it was that day in Tunisia, or how many takes we did. And I feel ... helpless."

Helpless?

Yes. In theater, you can take a little back with you the next night. But in film, there it is you can never improve it."

In the film, Marion seems motivated parily hy a vergetul passion for her hero and former lover, partly by a desire to recover the \$5,000 he owes her, but mostly by the filmmaker's need for a constantly imperiled herome.

"It's true that when I arrived. Steven said,

Continued on page 6W

now as much as ever." Shochiku's special school for SKD dancers.

Medieval and Baroque Music for Connoisseurs

by David Galloway

AINT-MICHEL-DE-PROVENCE, France — The turn off the Route Napoleon, a few miles west of Forcalquier, is marked only by a sign for the observatories of the European astronomical center,

There is nothing to signal the sharp turn off into a road scraped from the hillside that curves up to the headquarters of the recording company called Harmonia Mundi that specializes in medieval and Baroque music. From the severe but graceful buildings that rise on the hilltop, the view into the mountains of Lure and Luberon is spectacular, but it hardly sug-gests an expanding international concern, with offices in London and Heidelberg and another

soon to open in Los Angeles. Both the location and the remarkable ab-sence of anything resembling a sound studio reflect the verve and canny idiosyncrasy of the firm's founder, Bernard Coutaz. Though he performs bligging income of things mutical professes blissful ignorance of things musical, he has spent two decades discovering unknown works and underestimated composers.

Recording chiefly in churches and chateaus, Harmonia Mundi has succeeded in capturing the natural timbre of the human voice and of classical instruments, endowing them with a sense of space that cannot be duplicated by artifical acconstics. Harmonia Mundi had its origin in Coutaz's

idle remark in 1958 that he could make as good a recording as one be and a group of friends were listening to in Paris. "Then do it." someone taunted. So he did. A journalist who had studied literature and philosophy, he re-corded interviews and texts by French writers. Then be rented a studio, collared a musician and set off to produce improvide interviews and set off to produce improvised interludes between the spoken sections.

Baffled by the jungle of cables, the flashing lights and the Tom Swift gadgetry, he knew he must make a gesture to establish his authority. Marching to the piano, he struck a single note, pronounced the instrument out of tune and was acknowledged master of the pandemonium that followed.

Encouraged by the success of his first ven-

ture, Coutaz used his press credentials to visit all the major recording studios in France, to learn how the business functioned. Not one director spoke about music - only about production, distribution and cost indexes. He no longer saw ignorance as a handican and was soon producing records for established compa-nies, acting as artistic director and "letting others pay for my mistakes."

Researching texts and finding the right muncians are, for him, a kind of journalism. The

editor mediates between text and public. Still wary of putting a toe in the musical pond with a production of his own, he began to prepare another speaking record based on cycwitness reports of 65 people tortured in Algeria. When it came time to edit the material, he realized he had been so absorbed that be had neglected to make notes, and could no longer identify the stories. The tapes rest in an antique doughbox in his office. The concerned social vision that inspired them, however, ulti-mately produced four novels — two on Algeria, one on Vietnam and another exposing the way stringent post-prison control in France forces ex-convicts into a criminal milieu.

Coutaz's second recording, and Harmonia Mundi's best-seller, was a selection of Slavic liturgical music performed by exiled monks in a Belgian monastery. Asked why be should have begun with liturgical music, he folds his fine, expressive hands, rests his chin on them and says, "I knew something about Gregorian chants." It is the sole allusion to prior musical experience, or to his own early years in a monastery. But there is something in Harmo-nia Mundi's rigorous, no-frills dedication to quality, in the sunny but stringently functional offices, that tells the whole story.

Since its casual beginnings, the firm has pro-duced more than 500 titles — including the first recorded works of Telemann and Charpentier. In the next three months, there are 20 new titles to be released, with Handel's "Semele," Charpentier's unknown "Pastorale" and Pergolesi's "La Servante Maitresse" among them. Bach's "English Suites," rarely performed because of their immense technical demands, are currently being pressed. For it, Kenneth Gilbert will perform on his own harp-

Bernard Coutaz, the founder.

sichord, one of the world's most valuable,

sichord, one of the world's most valuable, which was built in Antwerp in 1671. The secret to creating such refined and dis-tinctive products is simply instinct, Coutaz in-sists. But he adds with a Gallic shrug and a mischievous gleam in the eye that the editor must remain attentive and adaptable if instinct is to have its way. Harmonia Mundi was born in the success dues of the LB when his comin the pioneer days of the LP, when big comsets of the complete symphonies of Beethoven and Mozart. Coutaz had neither interest in such extravagant productions nor the money to finance them and moved logically toward

medieval and Baroque music. Today, new projects may he proposed by the performers themselves, but the director remains constantly alert to new sources. Recent-ly he visited the obscure music library at Car-pentras, taking along a musician to whistle the scores, and came away with an extraordinary series of cantatas for solo voices by Campra, a 17th-century Provencal composer.

Bernard Coutaz passionately believes that small groups, working with enthusiasm and personal engagement, can produce a finesse the big recording companies rarely achieve, and critics clearly agree. Recent American re-views of Harmonia Mundi's version of the

Schubert "Trios" are lavish with superlatives. It was in 1962 that the energetic director of Harmonia Mundi paused outside his office near the Gare de l'Est in Paris and told himself

end, the audience becomes a sort of jury."

play the lead.

Now that she's a star, she would naturally

"No, not necessarily. I'd just like to be a part of the project, because I believe in it." Back at DuVal High, she recalls, she cared not a whit for drama, "I'd wanted to write, and

went to some meetings of Mass Transit [a

Washington discussion group], and they pub-lished some pieces of mine, a poem and a long prose piece. But I was also terminally shy, and

writing is an isolated task. Acting got me into

that the noise and fumes had become intolerable. He made a beeline for the Haute Provence, bought a ruined famphouse and never looked back. The following year he attended a concert by Alfred Deller in Avignon — his

first opportunity to hear the haunting flute-like tones of a true counter-tenor. "Totally 'bouleverse'," he packed singer, consort and luggage into his car and headed east. The musicans thought they were going to a party, but Coutaz could simply not bear to let them out of his sight. Until his death in 1979, Alfred Deller recorded exclusively for Harmonia Mundi, as his son Mark does now.

Together, Coutaz and Deller produced not only a series of brilliant recordings but estab-lished the Alfred Deller Academy, now begin-ning its 11th season at Lacoste. With visiting professors for recorder, harpsichord and late, now augmented by the full Deller consort, the

The Browns at La Potinière.

DINBURGH - The Scots are told so

often that they can't cook and don't

including selections from France, Italy, Cali-fornia, England, Spain and Portugal.

August 15-16, 1981

Page 6W

A large blackboard announces a few wellchosen daily dishes, which sometimes include the fruits of Mr. Maitland's hunting and fishing forays: in season, salmon from local waters or red deer, partridge or pheasant. There are bowls full of tomatoes, cucumbers and mushbowls full of tomatoes, cucumbers and mush-rooms and hot daily specials like chicken with curried rice. Mild and sweet, the geotly smoked, coarsely sliced Summer Isle ham from Achiltihuie io the Scottish Highlands is served with fiery mustard. One will lunch heartily, and well, here for about £5 (\$9).

To lunch at La Potinière io Guilane (tel: 843-214) a tiny table d'hôre 19 miles outside Edinburgh, call weeks, even months in ad-vance. The English-style French food is pleasant at this charming country inn, whereas the wine list is totally out of proportion to the establishment: Only a confirmed cynic could have a bad time here.

Six years ago. 30-year-old David Brown. an industrial designer, and his wife, Hilary, left Glasgow to settle in this golfer's paradise. Now, David indulges his passion for wine, Hi-lary anuses herself at the stove, and the clients all hut knock down the doors to eat lunch here oo weekdays and dinner on Salurdays.

Here, amid pink and white ironstone and red and hlue gingham, one can cat crisp homemade French bread, buhhling tomato-and-mint soup, eggs Florentine, turkey scal-lops with green peppercorns and a honey par-fait. Some come just for the wine list, one of the best in Scotland. For \$15 or less, enjoy half

the best in Scotland. For \$15 or less, enjoy half a bottle of 1961 Lynch-Bages or full bottles of 1967 Pape-Clément or 1967 Brane-Cantenac. The £6 (\$11) lunch is an equally good buy. Back in Edinburgh, try the North British Hotel's Cleikum Restaurant, named after a 19th-century gastronomic club. Stick to Scot-tish dishes in this casual basement restaurant. The haggis is delicious — a well-seasoned blend of certain conserved such schemes hlend of oatmeal, onions and suct, sheep's heart and liver, encased in a sheep's stomach. boiled steadily in stock and served moist and steaming — though the side dishes of neeps and bashed tatties (mashed turnips and mashed potatoes) are a forgettable ritual.

The poacher's broth, a brandy-colored, bean-thickened soup, was hearty and filling, and the Scotch broth, made of barley, broth and garden vegetables, was decent though uninspired. There's a good mixed grill of local lamh kidneys and assorted meats and Caboc cream cheese rolled in toasted pinhead oatmeal, served with coarse meal oatcakes. Though small, the wine list is interesting, with a 1969 Giscours priced at less than \$15. Din-

For fresh local fish, try Consteaus (109 Han-over Street, tel: 226-3355). The service is ama-teurish and prices are a hit high, but it's worth sampling the mild, briny oysters from the west coast of Scotland and nicely broiled fresh trout from nearby streams. Dinner for two will cost about £29 (or \$52).

Elsewhere in Edinburgh, stop in for the Scottish Younger's ale at the ground-floor Cafe Royal (17 West Register Street, tel: 556-1884), a landmark with a huge horseshoe bar, dim rosy lights and ceramic murals.

For some of the freshest cheese-filled his-cuits and warm oatmeal scones, try The Laigh Kitchen (117A Hanover Street, tel: 225-1552). an authentic Georgian kitchen with antique chioa on the walts and a large refectory table. This typical self-service restaurant serves assorted soups, salads and daily meat specials.

The art market Han Portrait of an Object-Hunter

ONDON — A highly unusual exhibi-tion is to be seen at Sotheby's first floor showroom, 34 New Bond Street, for another two weeks here. Although displayed in an auction house, the superb Japanese porcelain, shown here for the first time ever, is not and never will be for sale.

It was donated by the late Gerald Rettlinger to the Ashmolean Museum at Oxford. On the cover of the catalogue, which is an anthology of "Eastern Ceramics" from the bequest, not just a guidebook to the exhibition, the names of the museum and of Reitinger loom large, But it takes a magnifying glass to spot the logo of Sotheby Parke Bernet. For the first time in art market annals, an auction room is paying a vibrant postmortem tribute to one of the most remarkable collectors in this century.

Born in London in 1900, Reitlinger was the son of a banker. He was educated at Oxford, studied at the Slade and at the Westminster School of Art and, in due course, became a painter. Suddenly, he gave up. "I just wasn't good enough," be told a friend. So the failed artist turned to collecting, in

which his training gave him an immense ad-vantage over fellow collectors. He had the artist's vision, free of prejudice. He was utterly indifferent to the conventional categorizations of art accepted without a murmur in collecting circles in those days - recognizing, for exam-ple, Chinese 17th-century polychrome porce-lain but dismissing the earlier 15th-century. Blue-and-White wares.

He looked at Japanese porcelain when virtually no one else did. It was then regarded as a by-product of Chinese pottery. Moreover, "ex-port ware" was a most derogatory phrase when referring to objets d'art, and that is precisely what Japanese porcelain was — a derivative art created as a substitute for Chinese porcelain when Dutch traders could not get sufficient supplies of the real article.

Today, after 30 years of Abstractionism and other modern art schools, its attraction is more obvious. There is a freedom in the brushwork of the Japanese craftsman's painting his landscape in what he thought was the Chinese manuner that Chinese ceramics made for export certainly did not have. On a typical dish of the late 17th-century from the Arita kilns, for example, the hilly landscape painted in blue over the white ground borders on abstraction. It has none of the painstaking detail that the conscientious Chinese craftsman would have supplied. The ground is briefly sketched in a few dashing stroke and the rocky hills al-most look like blobs, It all has the hazy, feverish touch of 17th-century Zen painting. There is also a touch of humor about some

of these Japanese export wares. An early 18thcentury Arita dish is painted with a mythical

A 17th-century dish from Arita kilns.

animal of the so-called Kylin type. Its Chinese model would be seen soaring through space, ferociously snarling — hardly with that apelike look and a spray of flowers in its mouth.

Ofiver Impey, Assistant Keeper in the De-partment of Eastern Art at the Ashmolean and author of the catalogue, points out that some of the Chinese-style models must in fact have been painted in Holland. Hence, some very funny details of interpretation.

A failed artist, he turned to collecting. But he had the artist's vision, free of prejudice, indifferent to collecting circles.'

So discerning was Reitlinger's eye that his collection of Blue-and-White export ware from Japan is the finest in Europe outside Dresden, Japan is the innext in Europe oniside Dresden, Impey says. What is so remarkable about Rei-tlinger is that he had the ability to detect the supreme achievement in a surprisingly wide range of art forms. His collection of Innian pottery includes admirable specimens also to be seen at the Ashmolean Miscum. He bought Syrian pottery, too, including a few pieces that any great muscum would love to have. This interest seems to have been triggered

by a trip to Iraq in the 1930s to take part in some excavation work conducted by David Talbot Rice in that amateurish style which, until recently, was considered acceptable among Orientalists dealing with the Middle East.

Reitlinger motivation was probably the love of strange countries and the attraction of treasure hunting — a mixture of Romanticism and colonial era acquisitiveness, depending on which angle one looks at it from. He undoubt-edly had a scholar's inclinations and be produced learned articles - perhaps not of a very high standard but neither were those of his fellow archaeologist Talbot Rice, whose reports on Al Hira are regrettably imprecise.

Yet the scholar's instincts were not wasted. They blossomed in his collecting rather than in his writings. He was the kind of man who had an unerring flair for laying hands on the rare item, the vital link in a transition chain.

He bought only one signed drawing by a miniature painter from Islamic India, Abul Hasan, and it happens to be one of his earliest Persian-style court set up by the Islamic rulers of India in the late 16th century.

Significantly, Reitlinger never spent very much money. Despite his interest in the "Eco-nomics of Taste," the book on art market trends for which he is best known to the public. he was not an "investor." He was essentially an object-hunter.

Like most true collectors, he knew only too well how relative all knowledge is, particularly in art, and even more particularly in any art form that goes back more than three centuries. He therefore had no exaggerated admiration for the museum world. The limitations of the He was impatient, sometimes testy, again a typical feature of many true collectors. In fact, like most of them, be carried on a

monologue with himself or wrote books — which is not essentially different. Yet, in ap-parent paradox, be decided he wanted to see his collection in a museum. It was probably typical of his distrust of academia that he did not here work in the transmission of the did not bequeath it but negotiated the donation so he could see it installed the way he wanted.

After one museum did not respond prompt-ly enough, he went to the Ashmolean, which proved more tractable. It all ended in tragedy, although the ultimate conclusion was to Reitlinger's satisfaction. One day in February 1978, a fire broke out in his Sussex house, where he was to keep the collection until his death, according to the provision he had insist-ed on. The firemen came at once and the havoc was limited to a minimum, hardly affecting the most important part of his collection.

But for the 78-year old man, who was slight-ly hurt by the debris and was found wandering in his garden in despair, unable to take part in the rescue operations, the shock was too much.

He died three weeks later. After naming Sotheby's for so many years, his ghost must be cackling with glee at the sight of the old enemy not only erecting a memorial to his collection, but footing the bill for the very fine catalogue published as an art book by Philip Wilson Ltd, the publisher affiliated with Sotheby's. He died three weeks later. After haunting

Metz Pioneers the 'Total Museum'

by Francis Leary

ETZ. France — The Metz Muse-um of Art and History is a unique experiment in creating its plan of exhibits around beautifully lit structural remains of the past, from the Gallo-Roman period to the Renaissance.

The man primarily responsible for the elegant plan is Gerald Collot, the genial, whitehaired 54-year-old director. A graduate in archaeology and history from the University of Nancy, Collot has been at the museum for 25

It was Collot who convinced various municipal, state and regional authorities to spend 17 million frances on the museum's elaborate expansion program, completed last year, which added 35 new rooms, tripling the exhibition area, and audiovisual programs. (A complete tour would consume almost five bours, though Collot has devised 45-minute tours for the visitor in a burry, with brochures in English.) The result is a series of different, often

sumptuous, architectural environments spanning more than 1,700 years of history. Collot explains why it works for the 90,000 annual visitors: "The presentation consists of the complementary values of volume, color, mate-rial and lighting. To avoid fatigue, we arrange a room in different colors and lighting."

fi works so well that the "Metz concept" has now been adopted by UNESCO's International Committee of Museums

The 2,000-year-old city of Metz was a center of Gallo-Roman civilization from Caesar 10 Clovis, with a population of 30,000. Massive walls of sandstone, quarried in the region, with green and white marble dressing, on which the ight casts a soft amber glow, form the remains of Roman baths, comparable to those at Herculaneum. Statues of Roman gods, including a gigantic Jupiter, guard tombs and funerary

Engraving: Joshua with King David.

Summer Shows on the Rivieria: Leger, Picasso, Miro

urns, evoking the Roman practice of crema-tion, Gallo-Roman household articles, bangles, pottery, weapons and coins all recall the flourshing life under Roman imperium.

Collot's chronological scheme begins in Merovingian Metz, capital of the kingdom of Austrasia and a city of hot-blooded warriors. Its territory was the scene of ferocious conflict. notably that between the rival queens, Fredegunde of Neustria and Brunhild of Austrasia. who met a fearful end when captured by her foe and tied to the tail of a wild horse.

Merovingian ceramics, glassware, jewelry. combs, belts, scramasax or sabers reveal the contrasting brutal warfare and civilization of these early Christians. Most of the artifacts were found during excavations in Metz over the past 150 years.

From an overhead gallery, we look down on he chancel of the Merovingian church of Saint-Pierre-aux-Nonnains. Bathed in a warm red light, the 28 stone fragments constitute the most important ensemble of Merovingian sculpture. In a nearby room are five skeletons in glass-topped colfins, buried with various utensils and jewelry. The museum has 90 such skeletons, all in excellent condition, which

show Merovingian man to be big and lough. An audiovisual program of medieval liturgical rites in the Carolingian "Purple Room" introduces a new era, beginning in 640 A.D., with Arnoul, Bishop of Metz and an ancestor of Charlemagne. For centuries, a veritable cult of Charlemagne prevailed in Metz: The museum's bronze equesinan statue of the emperor is the only one in France, while it also possesses the sepulchre of Hildegarde, his wife. and of Louis the Pious, his son and Louis 1 of France. In the treasure of the huge 13th-centu-

Cathedral of St. Stephen may he found the so-called "cloak of Charlemagne" of purple silk with gold-threaded eagles.

Three Gothic rooms display fantastic painted ceilings depicting monsters and mermaids. directly illuminated so the visitor gazes upward. The decision to incorporate a granary, a five-story, 15th-century storehouse, the only one of its kind in Europe, has made possible an ambitious program of Gothic art and artisanship. Workshops illustrating the making of pottery, porcelain and glassware, the three primary products of Lorraine, have been set up for school groups, who participate in dem-onstrations. Eventually, the granary will house a complete collection of costumes, furniture and articles of everyday life, up to the Treaty of Wesiphalia in 1648.

Ascending a beautiful marble staircase, we look across the facade of an elegant Renais-sance mansion, built in 1529, with four extraordinary busts, perhaps representing the continents of Africa, Asia, Europe and South America. The center niche is empty and its bust has somehow ended up in the Boston Museum of Fine Arts. By a curious coincidence, the heads had come to Charles Munch, conductor of the Boston Symphony, before the museum purchased them from a Versailles art dealer, to restore them to their original setting,

The museum, open every day except Tues-day, also includes primitive and Renaissance art, as well as 17th-century painting. Metz, lo-cated on the autoroute to West Germany, is three hours from Paris by train. A bus at the Metz station marked "place d'Armes" goes to the cathedral, a short walk from the museum, 2 rue du Haui-Poinier, in the heart of historical Metz.

Myth and Ritual in Zurich

by Eva Karavan ---

URICH - Myth, the sacred story, and ritual, the repeated performance, have always been vital ingredients of civilization; myths to relate creation, rites to help validate their symbolism,

Today's artists find mythology a fascinating source of inspiration, and the exhibition "Mythos and Ritual," at the Künsthans here until Aug. 23 gives them the opportunity to express their personal interpretations of it. Most of the 16 artists don't exhibit objects of art but use the elements - carth, water, fire, wind - to create "places" or "spaces."

Ancient architecture inspired Anne and Patrick Poirier to create an "Endless Colonnade" and "Circular Utopia" - small white plaster lemples an soft light. "We live in a time in which many cultures disappear in the process of the croation of one universal culture," says Anne, Pointer. "In our reconstructions we try to save and preserve these disappearing cultures." Charles Simond's small-scale landscapes

sciousness, Arnuff Reiner continues the tradi-tion of "face language," using his self portraits to paint on them rituals of death and bodily violence.

Some of the sculptures seem to be ritual enpronments stolen from the open air, such as Michael Heizer's heavy and geometric "Platform," which looks like an ancient place made with modern materials, and Michael Singer's subtle wooden "First Gate Ritual Series."

Dani Karavan's "Sand Drawing" takes us to an ancient landscape, a huge desert in the mid-dle of which he places a sun dial. "I use the sau and the shadow to measure time," he says.

The secret signs on stones and bark are discovered by Nokolaus Lang in "Reading From a Stick." prints of drawings made by nature. Richard Lang, who usually works with stones, plays this time with sticks -- 862 of them in "Willow Line"." The common means given like co

ICE - The attractive little Chagall Museum set in a lavender garden in Cimicz, above Nice (Musée National Message Biblique Marc Chagall) each summer devotes a show to some aspect of religious art. This year it is Tibetan mandalas, 60 items from the Musee Guimet in Paris.

In the Buddhist paintings of Tibet, the circle - which is the original meaning of the word mandala - represents the cosmos as a whole ordered around its center; the story of the soul is represented as a pilgrimage towards that divine center. That, of course, is put too simply and any detailed understanding of these pieces would require more erudition than most visitors may care to acquire. Fortunately, one does

not really need that much to fall under the spell of the all-encompassing circle, whether it is seen in paintings (ranging from the 12th to the 19th century) or Baroque objects and sta-tues, mostly of gilded brass.

My favorile is a large delicately colored gouache on canvas from Mongolia of the legendary kingdom of Sambhala (Shangri-La). The kingdom is represented as a mandala within a circle of mountains as jagged as shark's teeth, divided from the turmoil of the world beyond by the symbolic thread of a sil-very waterfall. It is a land of contemplative screnity, but outside the land is devastated by battles, artillery fire and rampaging elephants.

West of Nice, and also on the inland heights, is the delicious little Grimaldi castle of Cagnes-sur-Mer, once a setting for musical and theatrical performances. As usual, this year's 13th "International Festival of Painting," (10 Sept. 30) is uneven. Much of it has the flavor of good poster art: simple graphic statements conceived with professional skill and executed with a certain slickness. Yet is is surprisingly lacking in expressiveness.

Man Ray's photograph of Marcel Duchamp as "RRose Selavy" | Eros C'est la Vie);" Michael Ashur, of Ireland, with a large. Op style space odyssey piece and Bycong-Seok Ahn, of South Korea, with his painting of hlowing grass. A bit further West we have the once superb

Statue of Charlemagne.

and austere village of Biot, now tarted up as a tourist spot. In the plain beneath stands the Fernand Leger Museum, which this year celehrates the centenial of Leger's hirth with a show of some 100 works on loan from private

collections and museums (to Sept. 28), Lèger seems to have been a likeable bulk of a man — something like France's answer to Alexander Calder. He died 26 years ago and one may now start asking just how well his art stands the test of time. First, one cannot help thinking that Leger's work needs to be seen in its historical context. Some works have a timebecause they 7711:1 belong to any age but because, although they are very much a product of their own age, they nonetheless stand on their own and can be met with complete directness, the way one child meets another. This is not generally the case with Leger, perhaps because in much of his work he reflects with a certain ingratiating naivete the popular social ideals of the first half of this century and, more precisely, those of the "Front Populaire," the coalition of parties of the left which, in 1936, brought significant so-cial reform to France (i.e. Social Security).

builders working on a skyseraper. The proportions are heroic, hut Leger's personal qualities are apparent in the fact that the tone is unpretentious despite the undeniable vigor of composition. Leger's esthetics and his ideals are connected to a specific period, and clearly dated, although he is seen as a forerunner of

Pop An. Westward once more, we come to Antibes and another Grimaldi palace, an archeological nuseum when Picasso met its curator in 1946. They became friends and Picasso one day declared that he yearned for a large space to do some big paintings. The curator. Dor de la Souchère, offered him the vacant top floor for six months, and Picasso subsequently gave the works he painted there to the city of Antibes. The huilding, now a Picasso Moseum, is cel-

ebrating the centennial of Picasso's hirth with casso at Antibes" (to Sept. 30). It inclu-

August 15-16, 1981 Page 7W

and houses built inside a broken wall are like archeological discoveries in an imaginary civilization.

Ancient people communicated by a visual language painted on their faces and bodies. "They could read faces as we can read books." says Claudio Costa, who is searching for the magic force contained in the original African masks by restructuring them with great con-

the simple twist of art," he confesses. Dennis Oppenheim's "Inner Voices for a Staircase" and Alice Aycock's "Installation,"

made of metal, wood and glass, are constructions in constant motion, imposing the magic of machinery.

Joseph Beuys is present bere with favorite elements — blackboard, table and lamp — in "Before the Departure from Camp." "Every installation l create," he says, "must have its private history and a relationship to the

human being." At first sight, it seems one always remains . an outsider to other individuals' myths, but the impact of this exhibition proves the contrary.

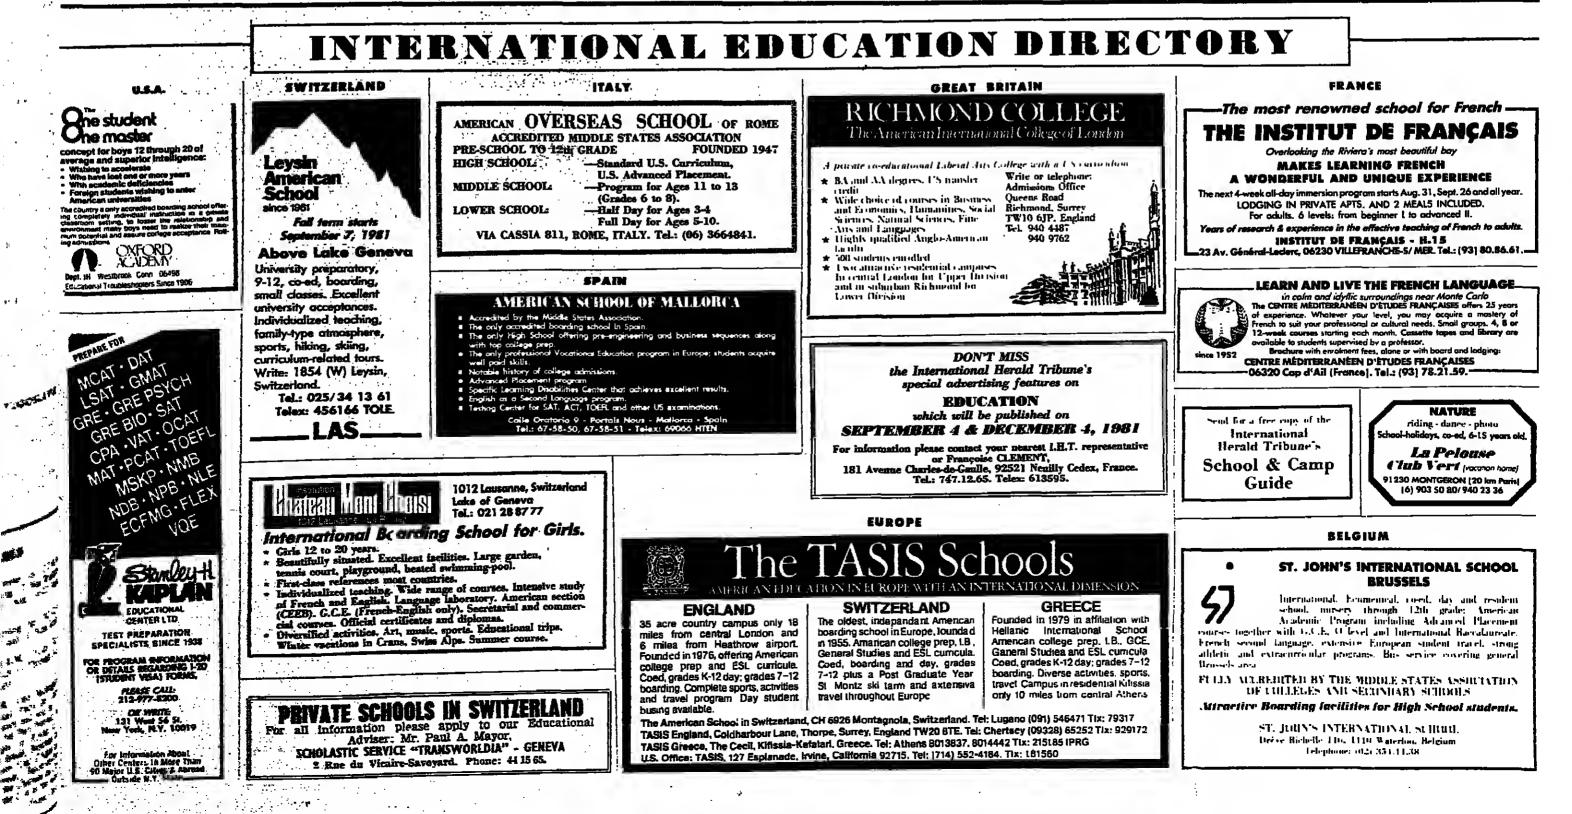

There is however a good case to be made in favor of the uneveness of the exhibition. There are good painters in the lot (Antonio Segui. for instance), and it may be that one is too much conditioned in viewing shows as the reflection of an individual choice. The paintings at Cagnes were chosen by various national committees, with all the randomness that implies. Among those awarded prizes this year were

Karoly Kelemen (Hungary) for her painting of

.

This seems to be at the root of large compositions showing a family bicycle outing or some 15tt items (paintings, drawings, sculptures, ceramics, tapestriest composing the permanent collection, and 60 pieces on loan. The hig paintings are well structured and full of authority, but otherwise rather empty. There are some excellent sculptures and ceramics, and the exhibit includes a collection of 17 engraved pebbles, never shown before, full of prehistoric directness and Grecian wit.

Finally, just off Cannes' Croisette, is the Galerie Herhage (17 rue des Etas-Unis), showing a small selection of Miró lithographs, aquatints and engravings (to Sept. 12). The works are very large, range from 1964 to 1978 and are dignified by a luxurious catalogue.

SEC Accuses J.S. Firm)f Bribery Cites \$1.39 Million In Foreign Payments

By Martha M. Hamilton

Washington Post Service WASHINGTON - The Securities and Exchange Commission has charged the largest mechanical contracting firm in the United States with funneling \$1.39 million in illegal payments to a foreign of-ficial in violation of antibribery provisions of the Foreign Corrupt Practices Act and antifraid provisions of federal securities law.

According to the SEC, Sum P. Wallace Co. of Dallas and two of its officials were responsible, di-rectly or indirectly, for payments made in six installments "to aid Wallace in procuring and maintaining certain contracts and billings with a certain foreign govern-

No Admission

Wallace and one of the officials involved consented to a court-ordered permanent injunction against similar acts without admit-ting or denying the SEC's charges. Robert D. Buckner, Wallace's chairman and chief executive officer, did not consent to the order.

As part of the court order, the company agreed to set up a special review committee to investigate the matter and report back to the court and the SEC.

According to the company, the SEC complaint resulted from its voluntary disclosure of informa-tion obtained during routine company andits. The company also said that a preliminary investigation of its own indicated that no officer or employee of the company benefited personally from the alleged payment. The complaint did not disclose either the identity or nationality of the foreign offi-

cludes

Wallace officials said that the payment did not involve Ghaith Pharaon, a Saudi Arabian businessman who indirectly holds 65 percent of the company's out-standing stock. One of the company's recent projects is a \$37-mil-lion contract for the Jidda International Airport in Saudi Arabia.

The company has divisions in Caracas, Sao Panlo, Trinidad, Cairo and London. Alfonso A. Rodriguez, executive vice president, and the other official named in the complaint, has been a regional manager of Wallace's Inter-American Companies.

Accounting Charges

According to the complaint, the

Makers of Antennae Dish Out New Styles — Geometrically

By Andrew Pollack New York Times Service

NEW YORK ---- The dish-shaped antennae that transmit and receive signals from satel-ites have what in humans would be called tunnel vision. They can "see" only one satellite at a time.

Some manufacturers think it is time for a new generation of antennae to correspond with several satellites at once since the number of domestic communications satellites is expected to grow from nine to more than 20

in the next few years. The current generation of antennae are shaped like dishes to capture the weak satelshaped nice dishes to capture the weat sate-lite signals and focus them at a single point, where a horn-shaped funnel feeds the signals to an amplifier. But because of a parabola's characteristics, the antenna can only aim in one direction at a time and beams from other satellites in other directions are not received. Already, there are problems cropping up from the narrow focus of the dish-shaped an-tennae. Three satellites, for instance, carry programming for cable relevision. To pick up all three satellites, a cable company needs three antennae.

Clamor for Space

Most cable companies have only one an-tenna, however, and are reluctant to pay several thousand or even tens of thousands of dollars for additional dishes. So programmers are rushing to get space on the one satellite that most of the cable companies receive --- RCA's Satcom 1. When the Satellite Program Network was moved off Satcom 1 to a different satellite, it bought 200 earth stations and gave them out to retain its castomers.

PARIS — After nearly three con-securive years of declining growth, Although such a conflict is com-

the British economy is likely to re- mon in most OECD-member

cover slightly next year, a new Or- countries, it seems to be more ganization for Economic Coopera- marked in Britain "given the sub-

tion and Development study con-. stantial loss of external competi-

In its annual survey of the Brit-ish economy, the OECD also said that Britain's unemployment rate

will continue to rise and its current ain aim at improving competitive-

account may swing into deficit ness and raising profits. Such again.

The report said that the British with a further easing of inflation-

government is facing, "a major di-lemma" on how to achieve slower reduction of wage settlements.

Soon, the reverse situation might occur Partly because they want to compete with Satcom for cable company attention, some satellite companies are trying to sell all their capacity to desirable programmers, like Home Box Office, a feature movie service that broadcasts over cable systems. That has raised protests from some less wealthy and less popular programmers, who fear they will be denied access to the satellites.

However, multiple-beam antennas, shaped as if they had been cut out from the side of a giant sphere, could help alleviate the situa-tion. Because, geometrically, one spot on a sphere is the same as any other, spherical reflectors can simultaneously receive beams from different directions at different points, with homs placed at those points picking up the signals from different satellites.

These antennae have been technologically feasible for a long time. The Communica-tions Satellite Corp. built a model of its Torus antenna in 1973, but only recently has the market been deemed ready for it. Satcom Technologies, a subsidiary of Radiation Sys-tems, is manufacturing and selling the Torus, under license from Comsat

The Torus antenna attempts to combine the multibeam capability of the sphere with the focusing ability of a parabola. The design — much like that of the back shell of a hollow doughnut — is purported to make the Torus more efficient than simple spherical reflectors.

"A Little Slow"

As well, two small private companies, the Antenna Technology Corp. and the United States Tower Co., have introduced spherical antennae in the last year.

cimployment.

1981.

Unemployment Rise

The OECD expects Britain's gross domestic product to grow by 0.5 percent next year, after dec-lines of 2 percent in 1980 and

From a yearly rate of 22 percent

in the second quarter of 1980, in-

flation dropped to less than 12 per-

cent in the second quarter of this year and is expected to fall to an annual rate of about 8.5 percent in

to generate a recovery in produc-

tiveness over the last two years and

Otherwise, the survey warned, a

it of 240.93 francs per 100 DM.

closing previously at 10.8480.

Weaker EMS currencies such as

the French and Belgian francs

have been under the most intense

pricing policies that reflect real

economic value, even if it means

the phasing out of subsidies to

first time that the United States

had voted against a loan under

Thursday's action marked the

The limited capabilities of parabolic dish antemae, as pictured above, have led to the development of antennae with different shapes and characteristics.

So far, according to Danny Weathers, vice president of United States Tower, "things have been a little slow." But he expects busi-ness to grow when more satellites are launched. Marvin D. Shoemake, president of Satorn Technologies with he expects to call Satcom Technologies, said he expects to sell 50 to 100 Torus antennae this fiscal year and 500 to 600 a year in three years.

Not everyone is optimistic. "Yes, the mar-ker's out there, but it's not this week," said Sidney Topol, chairman and president of Scientific Atlanta, a leading earth station supplier which has not entered the multibeam market.

One drawback is that one must want to view three to six satellites simultaneously before it becomes economical to use a mul-tibeam antenna instead of individual antennas. In addition, companies that already have one or more single-beam antennae might prefer to buy additional ones rather than to disgard their existing equipment in favor of a multibeam device.

Prices on NYSE Broadly Lower Fed Says U.S. Money Supply Rose \$5.1 Billion

BUSINESS/FINANCE

From Agency Dispatches NEW YORK - Prices on the New York Stock Exchange retreated across a broad front Friday ahead of an expected large increase in the weekly money supply figures.

After the market closed, the Federal Reserve issued its report, which proved the investors' fears Fed said. Analysts said investors were

U.S. Production Climbed by 0.3% In July, Fed Says

United Press International WASHINGTON — U.S. indus-trial production climbed 0.3 per-centage point in July, the Federal Reserve Board reported Friday, a turnaround from June and a sign the economy was making up for slumping antomobile output.

"It's a sluggish economy, but it doesn't want to die," said Evelina Tainer, an economist for the First National Bank of Chicago. The overall production figure for June had been down 0.1 percent.

Federal Reserve analysts said "most of the July rise reflected a continuation of the post-strike rebound in coal ontput." The sharp decline in the output of autos and trucks during July was offset by production of appliances and other consumer nondurable goods. Manufacturing output in July increased by 0.2 percent, the Fed said, following June's 0.6 percent

decline for that category. Production of durable goods was un-changed overall, despite the auto-mobile cutback. Nondurable man-

May. When food prices are not counted, the monthly increase for July was an extraordinarily low 0.1 persiasm was muted by expectations of a large increase in the money cent. That reading was the lowest since May, 1976, and a solid indication that the threat of future broad-based retail price surges is hsiding

The index for all wholesale energy products went down a full percentage point, helped by the third straight month of declines for gasoline. Home heating oil and gaso-line, measured by themselves, went down 2 percent in wholesale price on a monthly basis,

The Agriculture Department earlier this month lowered its esn-mates of overall food price inflation for this year, saying it should now reach 8.9 percent. The earlier government forecast was for food price increases at the retail level of 9.6 percent.

Canadian Prices Up 0.9%

The Associated Press

OTTAWA - Canada's consumer price index rose 0.9 percent in July, down from a 1.5-percent increase in June, Statistics Canada said Friday. From last July, prices have risen 13 percent, the largest year-on-year increase since 1948. It was seventh straight month that prices have been up over the previ-ous year hy 12 percent or more.

Of Turnover

Los Angeles Tomes Service LOS ANGELES — Every

manager. can expect a certain

amount of employee turnover,

but if the office entrance begins

content, Carl Youngs, president of Youngs, Walker & Co., an ex-ecutive search firm in Illinois, says that the employee revolv-ing door is a more widespread problem than many executives realize.

"Every manager will face unplanned-for employee turnover at some point in his career, no matter how popular a boss he is. He should know that it is not abnormal for this situation to occur. The key to solving it is to confront the situation immediately."

Often a disgrantled employ-ee is behind the problem, urg-ing others to jump ship. "His dissatisfaction may be caused by management, or it may not even be related to the job," Mr. Youngs says."He may be envi-ous of a neighbor's new car and swimming pool, and suddenly want more money than he knows he's worth, and he's frustrated."

Mr. Youngs' solution if a manager finds the troublemaker: "Fire him." pressure from the soaring dollar,

Are you a sports fanatic? Or could you not care less who's winning and at what? Are you crazy about tennis or biking but rumed off by baseball or golf? Do you like feature stories that provide an enjoyable "read"—or would you prefer more scores and statistics?	Questionnaires concerning other sections of the paper will appear in the coming months as part of our continuing review of how we can better serve our readers. Thank you for your co-operation.	14. 19. 10. 11. <th>25% 14% NAROW 5.20 1.111 3 12% 18% 18% 18% 18% 1 21% 14% NAROW 5.20 1.111 3 12% 18% 18% 18% 18% 1 21% 13% 11% Nowthe L12 8.7 4 3 17% 12% 12% 12% 12% 12% 12% 12% 12% 12% 12</th> <th>The 4 The Windows 2 The <th2 th="" the<=""> <th2 th="" the<=""> <th2< th=""></th2<></th2></th2></th>	25% 14% NAROW 5.20 1.111 3 12% 18% 18% 18% 18% 1 21% 14% NAROW 5.20 1.111 3 12% 18% 18% 18% 18% 1 21% 13% 11% Nowthe L12 8.7 4 3 17% 12% 12% 12% 12% 12% 12% 12% 12% 12% 12	The 4 The Windows 2 The 2 The <th2 th="" the<=""> <th2 th="" the<=""> <th2< th=""></th2<></th2></th2>
ers are most diverse. We hope the questionnaire below will help us understand them better. Whether you regu- larly read this page or not, your response will be very helpful—and greatly appreciated. Despite Auto Industry Slump, GM Stock Called a Good Buy for Patient Investors

By Vartanig G. Vartan New York Times Service NEW YORK - Is General Mo-

NEW YORK — Is General Mo-tors' stock currently a "buy" at nearly 80 times earnings? Some of the company's followers, looking ahead rather than at the price-earnings ratio for the last 12 months, say it is. One condition, they add is that investors he will they add, is that investors be willing to accompany the stock for a

long ride. GM recently reported a net in-come of \$1.72 a share for the sec-ond quarter of 1981, which was its third profitable quarter in a row. The latest price-earnings multiple, of course, takes into account part of the company's huge losses suf-fered in 1980. In that near-disastrous year for the U.S. auto indus-try, GM lost \$762.5 million, its first deficit year since 1921.

this week at about 48. Within the last year, its price has ranged be-tween 40% and 58%. In early 1977, the shares traded as high as 78%, and some years earlier had fetched

egist for the trust department of the Girard Bank in Philadelphia, considers the stock suitable for purchase at \$50.

eral Motors can be a big winner out over the next couple of years. By that time, the stock could easily sell at \$85 or \$90 a share by our estimate. Our reasoning is based

partly on the fact that the average car on the road is now six years old."

New-car sales repeatedly have fallen victim to high interest rates, Mr. Carver said. "But we expect General Motors to emerge from this period as a much stronger company. Patient shareholders are likely to be rewarded handsomely as a historically old automobile population is replaced by new fuelefficient cars."

David Healy, who follows the industry for Drexel Burnham Lambert, carries a "buy" rating for General Motors stock. One reason for his optimism is that the oew

GM's increasing market penetra-tion that should come from its ar-ray of oew models, will lead, we think, to sharp increases in earn-ings and dividends in the 1982-1983 period — an ontlook that is oot currently being discounted in the market." He estimates earnings

on its common stock, or an annual rate of \$2.40. Several years ago, the quarterly dividend was supple-mented by special and year-end payments. For example, the com-

pany paid dividends totaling \$6 a share or more in both 1977 and 1978, when profits were high. "Prospects for a year-end extra or an increase in the regular rate at the November, 1981, dividend meeting have faded somewhat," Mr. Healy said. "But a continuation of the regular 60-cent quarterly payment is our minimum expec-tation." At the Girard Bank, Mr. Carver said he did not expect any increase in the dividend payout before late 1982 at the earliest.

'Product Lead'

Citing GM's "product lead" that has developed over domestic com-petitors, Merrill Lynch's research department considers the stock as OK to buy," one notch below a top "buy" recommendation. Simi-larly, the firm's profit estimates run somewhat lower than at Drex-el Burnham Lambert. Merrill Lynch is projecting earnings of \$3.75 a share this year and \$9 oext year. Some investment houses, howev

er, remain reluctant to recommend automotive shares. Michael A. Ward of Dean Witter Reynolds told clients late in July: "If daily selling rates are used, three out of the last four months have shown gains. But the auto industry remains in the pits. Besting last year's second quarter - one of the worst periods in years - can hardly be called an achievement." He added, "We are oot yet

ready to recommend auto stocks, but the more that 1981 deteriorates and the closer we get to 1983 the better we feel about the stocks." Neither Ford Motor nor

Chrysler appears on the invest-ment list of the Girard Bank, Merrill Lynch ranks Ford as "ocutral" and has an "OK to sell" opinion

on Chrysler. Drexel Burnham Lambert also is "neutral" on Ford. "As for Chrysler," Mr. Healy ob-served, "we've had a flat 'sell' rating since November, 1977."

tax bill, especially after 1981, will put more dollars in the pockets of "We regard GM as an under-valued stock that is in an attractive buying range oow," he said. "The GM's stock has been trading eventual recovery in car sales, and a record price of 113%. Donald E. Carver, equities stratof \$4.75 a share this year, \$11.25 in 1982 and \$16 in 1983. Although he does not envisage any sharp near-term recovery in carnings, he said: "We think Gen-Since the second quarter of 1980, GM has been paying a quar-terly dividend of 60 cents a share **Firm Offers Market Share By Leasing Seats on NYSE** manent memberships), plus a handful who have bought annual memberships, giving them the right to be there and trade with their peers. Nonmembers who wish to buy and sell securices on the erchance who do a the securices on By Kenneth B. Noble New York Times Service NEW YORK - Samuel Weiss has found a better way to make money on the stock exchange than trading stocks and bonds. He is the exchange must do so through a member ---- and pay him accordselling seats. Mr. Weiss is selling interests in New York Stock Exchange seats, and eventually memberships on ingly. In the last decade, there have other exchanges, through a oew company, Stock Exchange Ser-vices. Last month, the NYSE ap-proved Stock Exchange Services' proposal to become the first membeen an estimated 120 membership transfers annually. This number declined sharply in 1978 when leasing of scals was permitted by the exchange. During that year, only 87 oew members joined the exchange by transfer of member-ship, while 54 scals were leased. ber firm to deal exclusively in acquiring memberships for leasing and investment. Currently, more than 100 member-The company is offering a manships are under lease, carning about \$60,000 a year each to the agement service for investors who want to purchase a seat oo the exicssors.

tion. The company is also offering loans and leasing arrangements to floor members - particularly ex-perienced clerks who lack the capital to purchase a seat.

"Until now, sears could be pur-chased either through the applicant's own means or some benefactor contributing the occessary \$260,000," Mr. Weiss said, referring to the current price of a seat. Therefore, only the rich or

During 1980, seat memberships ranged from a low of \$175,000 to a high of \$275,000. Boyers seeking exchange membership have spent anywhere from the peak of \$515,000 during 1968 and 1969 to a low of \$17,000 in 1972.

Volume Records

"There is a direct correlation between daily stock volume and the price of a seat," Mr. Weiss said. "With NYSE volume setting new

INTERNATIONAL HERALD TRIBUNE, SATURDAY-SUNDAY, AUGUST 15-16, 1981

Red Smith Morning Glories

New York Times Service SARATOGA SPRINGS, N.Y.— Through the fragrance of wood fires uning under the elms in the stable area behind Saratoga's main track, reaths of morning mist curled up to be burned away by slanting rays of mshine.

Hot-walkers led horses in lazy circles between the barns, while other prses stood relishing the flow of cool water from garden hoses trained their forekegs. Grooms swabbed horses with soapy sponges and their forekegs. Grooms swabbed horses with soapy sponges and tobed them dry. The rhythmic throbbing of hooves could be heard om the track itself, where horses were working. Lucien Laurin leaned on the rail, looking on. When he had smashers we Riva Ridge and Secretariat, Lucien lived in the eye of the burricane, wittenent swirting about him, but now he was at peace. No longer hag-

dden by worry, he enjoys his life on a training farm in Carolina, but he

ill misses the hag. He was wistful when he spoke of Saturday's Travers Stakes, the oldest id sometimes the most coveted race in the United States. "You know," said. "I never won a Travers."

Time Aplenty-

"You still bave time," a friend said. "If I remember, Nashua was the rst Hopeful winner trained by Mr. Fitz [the late James E. Fitzsimions), among all the great ones he had. And when he won, Mr. Fitz's iend Slim Sully said, Tell me another game where a man 75 years old in win his first Hopeful. So you've got plenty of time for the Travers." "Yes," Lucien said, "but then I'd have to go back to work. When I had ig Red. Mr. Hollie Hughes said, 'Lucien, can I speak to you for a inute?' He said, 'Tve seen them all — Man o'War, Citation, Count leet, Dr. Fager, all the great speed horses, and I'll tell you now, Secre-riat is the greatest racehorse that ever lived, and that Beimont Stakes of is was the greatest horse race." "
"And yet," the friend said, "one day you were showing me through the

arn, and Secretariat was there, but you walked on. And this,' you told re, 'is Riva Ridge, my darling.' Didn't yon have the warmest affection If all for him?

"Riva Ridge was a nice horse," Lucien said, "kind and generous and Nonest. You could do anything with him. But Big Red ' His words ailed away.

McCracken & Palmer

He turned back to watch a horse working hard along the rail. After a thile, Sam McCracken of The Boston Globe strolled along. Sam passed re clock ers' stand where Lucien's son Roger stood. "I saw your father," am said. "He looks great."

"So would you," Roger said, "if you weren't working." McCracken had left his credentials in a motel 15 miles away and had siked his way through the stable gate, a small miracle these days. Twenty years ago Joe Palmer wrote that for attractive odds he would. et that he could walk into any track in New York wearing prison stripes ad carrying a bucket clearly marked "HEROIN" and never be chal-

Today the New York Racing Association may be reluctant to investi-ate the possibility of fixed races, but the rules are strict for working iffs entering the barn area. This time, though, a guard had gazed on AcCracken's supremely honest face and reckoned it would be all right. Steve DiMauro has his string in Barn 24, close to the main track. He used us stable across Union Avenue in the area called Oklahoma, but he aid he had been moved up. At Oklahoma, a sign on the barn read: "The Maurolizer. He has some nice horses in 24." "The top one, I guess, is the filly The Very One," he said. "She's only boy 525 000 here a willion dollar. They one, " he said.

bout \$25,000 below a million dollars. There goes Accipiter's Hope, the orse that won the DeWitt Clinton."

Accepter's Hope is trained by DiMauro's 23-year-old son, Stephen L, and the DeWitt Clinton was a \$100,000 race.

"I hear you were more excited than if you had won the Arlington

Villicon or the Triple Crown," the father was told. Steve smiled. "I had to get up the entry money," he said. "Stephen lidn't want to tap the owner for it because the horse was 25-to-1, but he wanted to shoot for the moon." If any trainer younger than Stephen ever won a \$100,000 race, his name eludes memory.

Jolley Happy

LeRoy Jolley was walking from the track back to his barn. "Are you still happy?" a bystander called. In the first race Monday, Jolley's Genuane Risk had beaten three allowance mares like breaking sticks.

The race had been a seven-furlong event for fillies and mares of 3 and older who had not won two \$15,000 races since Nov. 15. It bore the proud name "The BNai Brith-Park View Apts.-The Northshore Senior Citizens." It had seemed odd to see last year's Kentucky Derby winner in the first half of the daily double, but the filly ran back to ber best

form, galloping by more than eight lengths. Her trainer was still happy because she had run like the lady who became America's sweetheart as the first Derby winner of her sex in 65 years, the only filly to finish first or second in the Derby, the Preakness und the Belmont, and the heroine who made Angel Cordero a fiend in I is feminist eye when he and Codex ambushed her in the Preakness.

and the second Yankees' Dave Winfield did some high kicking to avoid Tiger shortstop Alan Trammell's tag in the third inning Thursday. Running as teammate Graig Nettles struck out, Winfield stole second base. NCAA, Splinter Group Will Clash **On TV Rights in College Football**

By Bart Barnes Washington Post Service

WASHINGTON --- The National Collegiate Athletic Association, the supreme power in intercollegi-ate sports for 35 years, is facing the stiffest challenge to its authori-ty in years from 61 of the strongest and most influential schools in U.S. college football.

At stake are control over hundreds of millions of dollars in teleoutside the CFA. vision broadcast rights to some of college football's most hucrative games and, according to some sources, the continued viability of

the NCAA as the governing body for intercollegiate athletics. The dispute, which also involves the three major television net-

works, is over who has the right to negotiate TV broadcasts — the NCAA, which has been doing it for the last 25 years, or the College Football Association, a fledgling organization of 61 college football superpowers.

Warning

1982 season.

ing on NBC.

NCAA member institutions, warns Tom Hansen, assistant director of the NCAA, face disciplinary action, including probation and expulsion, if they appear on telecasts other than those ap-proved by the NCAA.

Pirates' Tiant Pitches Well In Return to Major Leagues

From Agency Despatible turned to the big leagues Thursday night.

At 40 - bellied, halding and barely two days after the Pittshurgh Pirates rescued him from their Portland farm club - Tiant embarked upon his 18th season in the major leagues (he had been released following the 1981 season by the New York Yankees).

He performed well, although he did not win, surrendering six hits and five runs in a 7-2 loss to Mon-treal here. But Tiant and 11,735 fans knew his performance was better than the numbers.

Tiant held the Expos scoreless on one hit through the first five innings. Andre Dawson, the Ex-pos' all-star center fielder, was hitless in three at-bats against Tiant, although he hit a grand-slam home The Expos got to Tiant for an uncarried run in the sixth before

loading the bases in the seventh. Shortstop Dale Berra's errant relay on a potential double-play ball hastened Tiant's departure.

After one-out singles by Larry Parrish and Mike Phillips, winning pitcher Steve Rogers bunted too sharply. Third baseman Bill Madlock turned and threw to Berra. covering at third; Berra's relay to first should bave beaten Rogers. It dido'L

Tiant then yielded a run-scoring double to Tim Raines and walked Rodoey Scott on a 3-2 pitch to load the bases. Pirate Manager Chuck Tanner summoned reliever Victor Cruz, who gave up the home run to Dawson — and another to the next hitter, Gary Carter. After the game, the Pirates optioned Cruz to Portland.

"I know I pitched good enough to win," Tiant said afterward, waving the cigar that accompanies him even to the shower. "It's happeoed

to me before." "I see all those young guys there. They are supposed to be prospects," he said, "I know I can pitch better than 90 percent of them. Due guyses to be the set of the set them. But everyone looks at my age. They wonder if I am really 40 - 40, 50, 100, what's the differ-ence? No one asked how old is

Any questions about the soundness of Tiant's arm should have been settled at Portland, where he posted a 13-7 record and a 3.87 carned run average in a hitter's

"My arm is good as ever," he said, "I'm not going to retire just because somebody says I'm too old. They don't pay me for my age. They pay me to pitch."

Luis Tiant and postgame cigar. ... I know I pitched good enough to win."

The Fans Are Elsewhere

PHILADELPHIA --- "Baseball is in for its worst financial year," says Bill Giles, executive vice president of the World Champion Philadelphia Phillies.

"We're going to have to sweat it out," Giles said Thursday of attendance problems the 26 major league teams face in the second half of the shortened season following the 50-day player strike. "Last year, eight teams made money." he said. "This year there will be fewer than eight that draw well."

The Phillies certainly are feeling the crunch. They drew a 60.561 sellout Monday because Pete Rose was about to hreak Stan Musi-al's National League career hit record. But the next three nights, they drew 8,200, 9,100 and then 5,700 fewer fans than their daily pre-strike average of 32,000.

Pattern: 'Hard Times'

"I think hard times are pretty much the pattern," Giles said, adding that he figures the Phillies will be off 25 to 30 percent for

It is part of the CFA agreement with NBC, he added, that the NCAA receive 8 percent of the rights fee, the same as the NCAA ence and such independents as Penn State, Notre Dame, Pitts-burgh, Syracuse, Army, Navy, Florida State, Tulane, Virginia Tech and West Virginia. receives from ABC and CBS. Of the major conferences, only the Big Ten and the Pacific-10 are

"Institutions have an obligation as part of their membership obligations to participate in the NCAA [television] plan," said Dave Cawood of the NCAA.

"When they are negligent in ful-filling their membership obliga-tions, they are subject to enforcement proceedings and, when enforcement proceedings are focused on the negligence of membership obligations, all sports are affected

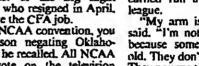

"If the NCAA puts the College Football Association on probation, isn't the NCAA putting itself on probation, as well?" asks the CFA's Neinas.

Joe Paterno, football coach and director of athletics at Penn State and a member of the CFA negoti-ating team, said there is no intent by the CFA to damage the NCAA. Ve don't want to se

covering their programs. Pete Rose."

or not.

members passed a resolution reserving for themselves until fur-ther notice all rights to network and cable telecasts of their football contests. They also authorized their board of directors to investigate the possibility of a separate television package. Voting in Atlanta will be in_ closed session, and a simple majority will decide the issue. Should the CFA members opt for the NCAA package, that will be the end of the issue. Should they go with the CFA-NBC plan, they will have three weeks to reconsider, and another vote will be taken. Charles Stanford, vice president for legal affairs at ABC-TV Sports, said the agreement with the NCAA provides for an escape clause if the CFA opts for the NBC package. "We bought a bundle of rights, which we feet includes the rights to college football games of large and small schools. It includes the rights to the A-l football powers. If the NCAA can't deliver them, we haven't received what we paid for

United Press International

tiated late last month by the NCAA and ABC-TV and CBS-TV LOS ANGELES - U.S. District Judge Harry Pregerson has desince many of the teams ABC clared a mistrial in the Oakland and CBS would expect to appear Raiders-National Football League on their telecasts would be appearantitrust suit because the prospects for a unanimous verdict were Among the CFA schools voting on the NBC package will be those "nonexistent," which ensures that the Super Bowl champions will remain in Oakland at least one more year.

Pregerson reluctantly declared the mistrial late Thursday after lengthy meetings with attorneys and private interviews with each of the 10 jurors. He scheduled a second trial to begin Sept. 21.

The judge stopped the trial of the suit filed by the Raiders and Los Angeles Coliseum Commis-sion against the NFL and city of package. Oakland after 55 days of testimo-ny and 13 days of deliberations. Pregerson told the seven-womdoing business."

an, three-man jury, "It appears to me that the likelihood of the jury arriving at a unanimous verdict is nonexistent."

Attomeys for both sides said the second trial will focus exclusively on whether the NFL violated antitrust laws by prohibiting the Raiders from moving to Los Angeles. The issue of whether the NFL deowners breached an oral agreement with Raider Owner Al Davis that would allow him to move south will not be taken up in the retrial, attorneys said.

"The second trial is going to be a lot shorter," said Coliseum Commission attorney Maxwell Blecher. "The judge is going to impose time limits and they're going to limit the case to the antitrust issue."

Attomeys said Pregerson decided on the mistrial after receiving a series of six messages from the jury Thursday. The contents of the messages were not disclosed, but attorneys said six of the jurors indicated they did oot believe a verdict could be reached.

Prospects of a deadlock in the suit - filed after the NFL blocked Davis' effort to move to the Coliseum, which was left vacant when the Los Angeles Rams moved to Anaheim Stadium last season --first appeared likely last week

The primary issue the jurors were trying to decide was whether enforcement of an NFL rule requiring three-fourths of the league's teams to approve any franchise shift was an unreasonable restraint of free trade.

and we have no agreement." Said a spokesman for CBS: "I think everybody is on hold and the Nielson Leads U.S. Golf

lawyers could get rich." An NBC spokesman said, We've had an ongoing relationship with the CFA for two years. Our main concern was to get in-volved with college football and showcase it as part of a prime-time "We're not naive. We're aware that the NCAA maintains they are the agents for those institutions that are involved in college football. But the CFA maintains otherwise, and we're in the marketplace

WETHERSFIELD, Conn. Lonnie Nielsen shot an 8-underpar 63 Thursday to take the firstround lead in the Sammy Davis Jr.-Greater Hartford golf tournament. Tied for second, two strokes back, were Bill Kratzert, Phil Hancock, Jay Haas and Roger Malthie. At 66 were Dave Stockton, Dana Quigley, Tim Simpson, Mike Morley, John Amazza, Rex Caldwell, Bill Britton, Mark Lye and Scott Simpson.

The Associated Press

the rest of the season.

Supporting his view was a report in the Battle Creek (Mich.) Enquirer and News, which determined that ballpark attendance has dropped steadily since play was resumed Monday.

The paper said the two major leagues had a comhined average attendance of 20,477 per game before the strike. On Monday, attendance at major league games averaged 25,737 — boxsted hy the crowd at Veterans Stadium — but dropped to 17,777 Tuesday, 14,238 Wednesday and 14,297 Thursday, the newspaper said. Wednesday's and Thursday's attendance represented a drop of 30.4 per cent from the pre-strike games, it calculated.

"Generally, I expect rough times for the next six weeks," said Giles. "I think there's a chance within 10 days or so that things might bounce back, hut I kind of doubt it."

INTERNATIONAL HERALD TRIBUNE, SATURDAY-SUNDAY, AUGUST 15-16, 1981

Art Buchwald

Flounder a la Mode

WASHINGTON - What hap-**W** pens when you live on The Island is that people like to fish. There is nothing wrong with this except it's not fun to fish if you can'i serve it to your guests for dinner. There is nothing wrong with this. except that everybody is always catching the same fish at

Page 14

the same time. When the bluefish are biting. there is bluefisb on every table on 9È the island. Then there seem to be nothing but flounder on your plate. one B in h

Every seems to have Buchwald striped bass in the same week. And then we're all overdosing on fluke.

The thing about the fish dinners is that you have to go through a

certain ritual before you get to cat. During the cocktail hour you must listen to how the fish was caught. The other night at Scudder's we were mesmerized as our host described how his 11-year-old grandson pulled in a 14-pound bluefish, the very one we were going to eat that night.

Not since "Jaws" had there been such a battle between man and a denizen of the deep. The hluefish, having chomped on the grandson's hook, was so angered he attacked the boat and tried to bash in the

But the grandson, a true Scudder, held fast, determined 10 win the prize. The hluefish broke the

U.S. Show Canceled; Prints Are 'Fakes'

The Associated Press SAN DIEGO --- The San Diego Museum of Art says it has canceled an exhibit of 18th-century Japanese prints after a resident expert said the works were fakes.

Steve Brezzo, director of the museum, said that the prints were purportedly done by Utamaro, in the golden age of Japanese print-making. While preparing the showing, doctoral student Sung Yu discovered they were done "hy a group of fakers," Brezzo said. "These kinds of things happen weekly in a museum," Brezzo said. "There would be a lot of art scholars unemployed if that weren't the

line, but the grandson threw out another one, and the furious blue bit hard on it, determined to pull the boy over the side. Scudder told us be put the throttle in full gear. determined to make the blue run for its money as the lad held on for dear life. The blue finally knew be had

met his match, and after one more attempt to wreck the boat and drown all aboard, finally gave up and was pulled over the side where it flopped on the deck for a good five minutes before expiring and being thrown in the ice cooler for the long journey bome. So what we were having for din-ner wasn't bluefisb but the proud-

est moment in Scudder's life. * * *

The next night we went to Brack's. His story was different. He had been out all day long with his house guests and they had nary a bite. On their way back to port they forgot to pull in all the lines. Danned if the line in the water didn't start wiggling and twisting. The fisb literally jumped onto the boas almost at the dock, and that, Brack told us happily, was why we were having bluefish for dinner in-stead of the large steaks that Betty Brack had ordered just in case the fishing party had no luck.

Bluefish Chowder."

It was our turn the oext evening and my wife and I discussed the menu. We thought as a surprise we would serve Virginia ham. My wife was sticking pieces of pineapple on the ham when there was a knock on the door. It was Scudder. He was holding a wet newspaper package. "You're oot going to believe this," he said, "but my grand-

son caught another bluefish. Since we're coming to your house to-night we didn't want it to go to waste, so we thought you'd like to serve it for dinner tonight." "You're too generous," I said. "Why don't you let the boy eat his

own fish?" "He hates hluefish," Scudder ex-

plained. "But you raved so much about ours, we couldn't think of anyooe who would appreciate it more.

International Herald Tribune **D**ARIS — Rising to new heights of muscular zeal in the last quarter of the 19th century, the Salvation Army saved souls in the darkest places, aided by music, martial discipline and unyielding faith. General Wil-liam Booth and his wife reserved their first daughter, Catherine, for the darkess and most alarming place of all. "I have offered for France," said Mrs. Booth

and off Kate went. Accompanied by two teen-age girl lieutenants, Kate Booth came in Paris just 100 years ago, in 1881. It was, she said, a veritable Sodom. She could hardly have come at a more turbulent time: crime, absinthe, disease, violent anti-clericalism, the early days of the Third Republic and the bitter memories of the Commune. One of the first hings the Army girls learned to do was to pin on their bonnet strings instead of sewing them fast. Men in cafes would try to strangle them from behind by

The following day at lunch Mrs. McCartney announced she had a surprise for all of us. Mr. McCartney had made the only dish he ex-cels in, which he modestly named 'McCartney's Secret Hagen-Daz

catching the strings and pulling them light. Parisian Projectile Forty-kilo rocks were hurled into meetings, the girls suffered physical and verbal abuse. One Salvauonist was hurt hy a typically Parisian projectile: an oy-ster sbell. By the fifth anniver-sary of the Army in France, 200 of its soldiers had been injured,

175 arrested, and one killed. Kate never flinched. She had made ber first public speech aged 14 and at 11, when asked what part of the Bible sbe liked best, calmly replied the atonement. When she arrived in France at the age of 22 she was called la Capitaine. Within eight months, and for the rest of her life, she was the Field Marshal or la

Marechale. In her very old age (she lived to be 96) she was still signing letters with joyous exuberance; Courage comrade - en avant! Yours for victory, la Marechale." She attributed her longevity to eating raw onions,

The centenary of La Marechale's arrival in France has Marechale's arrival in France has been celebrated by a biography, "Heavenly Witch," by Carolyn Scott (published in London by Hamish Hamilton). Resented and jeered at for her clothes, her accent, her optimism, La Maréchale came to be respected and even loved hy the French, who paid her their highest compliment, "She has the French

temperament. She loves France."

© 1081 Los Annales Times Survives

She did love it. When Gen. Booth ordered her from his London beadquarters to leave for Holland after 15 years in France, she obeyed but did not quite regain her spirit until she returned years later after a painful break with her father and the Army.

Fierce Blondness

Even when they were attacking ber, Parisians admired her fierce blondness and ber bold style. She refused to use an interpreter -"If I begin with crutches I shall always need crutches" - and developed her own fluent and idiosyncratic French, translated literally from English.

When she preached about the water of life, she did not realize, Hell; at another, Les Singes, the waiters were dressed like moneven when people laughed, that eau-de-vie was a liquor. She inkeys and ran up and down a tended to call her newspaper Amour but settled for En Avant winding staircase. when it was pointed out that her girls could not go around crying "Amour, I sou." When she ended a sermon with the words, "Si middle classes disapproving. When Kate went to speak in Switzerland, she was ejected from Geneva and imprisoned in dans la nuit si vous sentez dans la silence le besoin d'une amie," she Neuchâtel Success was slow, but real. "ft is not an easy task," Kate admitbad no idea that she was telling her audience to come to her if during the silence of the night ted. "Twelve souls converted in they needed a lady friend. "Go home, Miss Booth," one France seems like 4,000 would seem in England." Typically, she added, "If anyone is afraid of

man said to her after a meeting, "The Salvation Army cannot succeed in France." "The churches fail in France because France requires sacrifice," she shrewdly observed.

a filthy factory in the rue d' An-When la Maréchale came to goulême in the slums of Belle-France the common people were not prepared for her religion or quai Valmy, on the edge of the canal famous for its suicides. By for any other: They did not associate God with goodness or the time of the great exhibition joy. The mere mention of the of 1889 the Army was near the name Jesus made them think of the despised Jesuits, recently ex-Opera, next door to Thomas Cook's, and the building had pulsed from France. "We'll listen electric light, flags of many nato you if you don't talk about Jetions, and "Vive Jesus Christ" sus. We hate Jesus," one man written in silver above the stage. shouted, shaking his fist in her In the '30s le Corbusier designed

Bringing the message that God could love even his most abused a hall and dormitory for the Army. and degenerate creatures, Kate went around to slums and distionist with a tenebrous hlack gusting cafes. One night she beard, Arthur Clibborn, wbo, played music and talked in 16 like other Booth sons-in-law, changed his name hy deed poll. cafes. One of them was called

Since Kate was Arthur Booth Clibborn's senior officer, he had to promise to obey her. He always referred to her as La Maréchale. Two ought to ran faster than one on the road to Calvary," was Kate's comment on marriage. They were happy, however, and in 1902 she gave birth 10 her 10th child.

Troubles with Gen. Booth had already begun. He had become increasingly autocratic; the Army with its red tape, had become too much like an army. In addition there were ideological problems - Arthur was a paci-fist, Kale felt that while the Army was right to concern itself with social work, its original re-ligious mission should not be forgotten.

'Freak Evangelists'

The break with the Army was the worst blow of Kate's life. Despite her advancing age, she went to Europe, Australia, the United States. "We have been deluged in this country with freak evangel-ists who could do certain tricks which catch the passing attention of the crowds," she was told in Chicago,

The doors of the Salvation Army remained closed to her and when in 1925 a book was published by the Army in France about its history; La Maréchale was not mentioned, except as Miss B----. Yet, before her 90th birthday she confessed, "I am still a Salvationist at heart."

Very late in life, she took to wearing colored dresses: "All my life I've worn navy, now I shall wear pink." Her bonnets were a riot. She worked to the end, keeping three secretaries busy. and when she died in England in May, 1955, a recoociliation of sorts was effected: Gen. Kitching The Army's first Paris hall was of the Salvation Army was at the funeral and referred to her as La Marechale.

In Paris today the Army has even centers and 600 soldiers. It has been celebrating the centenary of its founding with meetings, concerts and even a musical called "Glory." Although the French are given to naming streets after generals, the Army's attempt to get the me d'Angoulême, where she began, renamed after La Maréchale has failed, as has an attempt to get a stamp issued in her honor. If there are oo monuments to Kate, four or five streets in the French provinces are named after Gen. William Booth — in territory first braved by La Maréchale.

Frank Sinatra, who is performing this week at a luxury hotel in São Paulo, Brazil's industrial center, is planning to travel the world at the end of next year - singing as he goes, of course. A spokesman, Lee Solters, said that the entertainer "will try to go to some of the places he has always wanted to visit but has never been able to, and he'll go back to places he has al-ready been to." If Sinatra had any little-town blues before, chances are they melted away with his current tour, which began in South Africa and included Argentina before Brazil. He returns home to the United States after finishing his engagement in São Paulo on Sun-

day.

The Internal Revenue Service is seeking \$14.8 million in additional taxes from Elvis Presley's estate, claiming the estate failed to report. all revenues generated from the singer's enterprises. The Commercial Appeal in Memphis reported. The newspaper said that the IRS has challenged everything from the valuation of Presley's Graceland estate to the amount of a divorce settlement granted Presley's for-mer wife. The additional IRS

as they were married by And op of Canterbury Robert Line * * * An American traveller and er, Robert M. Lee, has made agreement with the Chinese thorities to organize hunting eno first time since the Community of tory in 1949. Lee, chairman of a New York-based Hunting, Wat Inc., said in London he planned take his first hunting expedition northeast China late this sum Members of the expedition, be around \$3,500 dollars plus.a cence fee for about one w would be hunting bear, wapin a deer and wild boar in the Ta
